PREFACE	
1. INTRODUCING THE DISTRICT	i-xxiv
2. INTRODUCING THE STATISTICS	1-4
3. THE VILLAGE DIRECTORY	5-109
4. A—GENERAL POPULATION TABLES	
A—I & Appendices — Area, Houses and Population.....	111-129
I & III	
A—II — Variation in Population during sixty years.....	130
A—III — Villages classified by population.....	131-132
A—IV & Appendix — Towns (and Town-groups) classified by population in 1961 with variation since 1901.....	133-134
5. B—GENERAL ECONOMIC TABLES	
B—I — Workers and Non-workers classified by sex and broad age-groups.....	135-137
B—III Pt. A — Industrial Classification of Workers and Non-workers by educational levels in urban areas only.....	139-140
B—III Pt. B — Industrial Classification of Workers and Non-workers by educational levels in rural areas only.....	141-147
B—IV Pt. A — Industrial Classification by sex and class of worker of persons at work at Household Industry.....	158-160
B—IV Pt. B — Industrial Classification by sex and class of worker of persons at work in non-household industry, trade, business, profession or service.....	161-166
B—IV Pt. C & Appendix — Industrial Classification by sex and divisions, major groups and minor groups of persons at work other than cultivation.....	167-171
B—V — Occupational Classification by sex of persons at work other than cultivation.....	172-195
B—VI — Occupational divisions of persons at work other than cultivation classified by sex, broad age-groups and educational levels in urban areas only.....	196-200
B—VII Pt. A — Persons working principally (i) as Cultivators, (ii) as Agricultural Labourers or (iii) at Household Industry classified by sex and by Secondary work (i) at Household Industry (ii) as Cultivator or (iii) as Agricultural Labourer.....	202-204
B—VII Pt. B — Industrial Classification by sex of persons working in non-household industry, trade, business, profession or service who are also engaged in Household Industry.....	205-210
B—VIII Pt. A — Persons unemployed aged 15 and above by sex, broad age-groups and educational levels in urban areas only.....	212-213
B—VIII Pt. B — Persons unemployed aged 15 and above by sex and educational levels in rural areas only.....	214
B—IX — Persons not at work classified by sex, broad age-groups and type of activity.....	215-221
6. C—SOCIAL AND CULTURAL TABLES	
C—II — Age and Marital Status.....	222-230
C—III Pt. A — Age, Sex and Education in all areas.....	231
C—III Pt. B — Age, Sex and Education in urban areas only.....	232
C—V — Mother tongue (alphabetical order).....	233-239
C—VII — Religion	240-243
C—VIII Pt. A — Classification by literacy and industrial category of Workers and Non-workers among Scheduled Castes.....	245-246
C—VIII Pt. B — Classification by literacy and industrial category of Workers and Non-workers among Scheduled Tribes.....	247-248

7. SCT—TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

SCT—I Pt. A	— Industrial Classification of persons at work and non-workers by sex for Scheduled Castes	250—254
SCT—I Pt. B	— Industrial Classification of persons at work and non-workers by sex for Scheduled Tribes	255—257
SCT—II Pt. A	— Age and Marital Status for Scheduled Castes	259—261
SCT—II Pt. B	— Age and Marital Status for Scheduled Tribes	262—264
SCT—III Pt.A(i)	— Education in urban areas only for Scheduled Castes	266
SCT—III Pt.A(ii)	— Education in urban areas only for Scheduled Tribes	267
SCT—III Pt.B(i)	— Education in rural areas only for Scheduled Castes	268
SCT—III Pt.B(ii)	— Education in rural areas only for Scheduled Tribes	269
SCT—IV Pt.A	— Religion for Scheduled Castes	270
SCT—IV Pt. B	— Religion for Scheduled Tribes	271
SC—I —	— Persons not at work classified by sex, type of activity and educational levels for Scheduled Castes	272—273
ST—I —	— Mother tongue and Bilingualism for Scheduled Tribes	274—275
ST—II —	— Persons not at work classified by sex and type of activity for Scheduled Tribes	276—277

8. INTRODUCING THE OFFICIAL STATISTICS.....278—281

9. TABLES ON OFFICIAL STATISTICS

1. RAINFALL AND TEMPERATURE

1.1 Monthly Total Rainfall at important centres in the district from 1951 to 1960	282—284
1.2 Average Annual Rainfall at important centres in the district	284
1.3 Maximum and Minimum Temperatures by station and by month in the district from 1951 to 1960	285—286

2. VITAL STATISTICS

2.1 Number of births and deaths as reported in the district from 1951 to 1960	287
2.2 Deaths from some selected causes in the district from 1951 to 1960	287

3. LAND UTILISATION AND AGRICULTURE

3.1 Land Utilisation Statistics in the district for the decades 1901 to 1961	288
3.2 Area under principal crops in the district for the decades 1901 to 1961	289
3.3 Gross area irrigated under different crops in the district for the decades 1901 to 1961	290
3.4 Sources of irrigation in the district for the decades 1901 to 1961	290
3.5 Medium irrigation project in the district	291
3.6 Yield rates of principal crops in the district, 1951-52 to 1959-60	292
3.7 Daily agricultural wages at some selected villages in the district from 1957 to 1960	293—296
3.8 Fortnightly wholesale prices of important commodities in the district from 1958 to 1960	297—332
3.9 Average retail prices of important commodities in the district from 1951 to 1960	333—343

4. LIVESTOCK

4.1 Variation in the number of main Livestock in the district during 1945 to 1961	344
---	-----

5. INDUSTRIES

5.1 List of all categories of industries in the district based on Houselists	345—349
5.2 Large scale industries and registered factories in the district	352—353

6. ADMINISTRATION

6.1 Number of criminal cases tried and persons convicted in the district from 1951 to 1960	354
6.2 Strength of Police and Jails in the district from 1951 to 1960	355—356
6.3 Different types of Co-operative Societies in the district from 1951-52 to 1960-61	357
6.4 Receipts of revenue under different heads in the district from 1951-52 to 1960-61	358

7. PUBLIC HEALTH AND MEDICAL

- 7.1 Different classes of Public Health and Medical Centres in the district from 1951 to 1960.....339

8. EDUCATION

- 8.1 Number of different types of educational institutions and number of students in the district in 1959-60 and 1960-61.....360—362

9. PUBLIC ENTERTAINMENT, PRESS AND JOURNALS

- 9.1 Number of Printing Presses, Newspapers, Cinema Houses, other places of public entertainment and Periodicals & Journals.....363

10. COMMUNICATION

- 10.1 Names and length of village roads in the district364—381
 10.2 Different categories of roads in the district as on 31st March, 1961.....382—383
 10.3 List of important bridges on National Highways in the district.....384—387
 10.4 Railway Stations in the district from 1950-51 to 1960-61.....388
 10.5 Navigable waterways in the district.....389

11. LOCAL BODIES

- 11.1 List of Anchalik Panchayats in the district.....390—391
 11.2 List of Municipalities & Town Committees in the district.....392

12. COMMUNITY DEVELOPMENT

- 12.1 Names and Stages of the Community Development Blocks in the district.....393

13. BANKS AND SMALL SAVINGS

- 13.1 List of Banking Institutions functioning in the district.....394
 13.2 Gross and Net collections on Small Savings in the district from 1951-52 to 1960-61.....394

14. FAIRS AND FESTIVALS AND HATS AND MARKETS

- 14.1 List of Fairs and Festivals—times of the year and duration in the district.....395—396
 14.2 List of different types of Hats and Markets in the district.....397—398

15. CALENDAR OF IMPORTANT EVENTS

- A descriptive note on the calendar of important events of the district.....399

16. ANCIENT MONUMENTS, PLACES OF WORSHIP AND GAZETTEER OF PLACE NAMES

- A descriptive note on the Ancient Monuments and Antique objects & Gazetteer of place names in the district.....400

PREFACE

District Census Handbooks were introduced for the first time during the 1951 Census. In the 1961 Census, the District Census Handbooks have further been improved by making the introduction of the districts more elaborate, by the addition of official statistics and by having separate tables for Scheduled Tribes and Scheduled Castes. The introduction to each district is a sort of gazetteer giving the physical features, geological data, climate, rainfall and temperature, flora and fauna etc. and a short history of the people inhabiting the district. Sociological data about the people have also been given briefly. Attempts have also been made to appraise the impact of the two Five Year Plans on the economy of each district. Official statistics are given in the form of tables, but there is also an introduction explaining the purpose and utility of the official statistics. For example, the District Census Handbook will supply the number of schools and dispensaries existing in each district as well as the road mileage and many other data which one would like to know about each district. Such data will be useful to the administrators, legislators

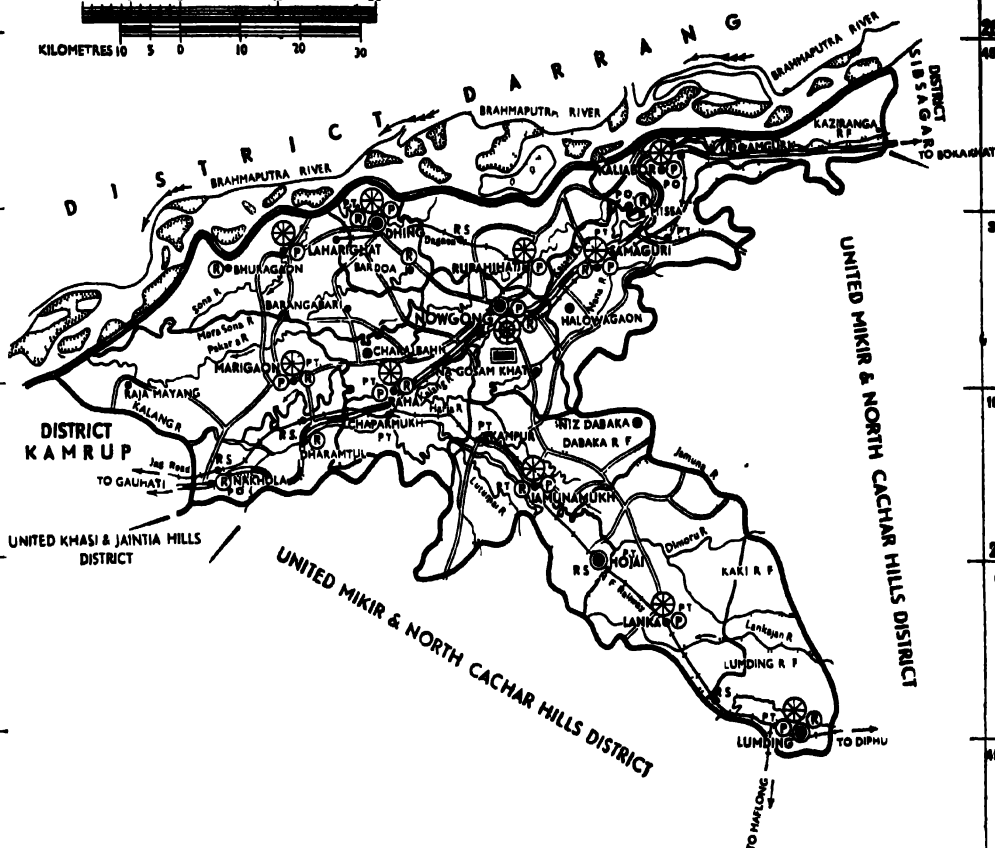

and sociologists who want to study the people of any district.

Data on the various subject mentioned above have been collected from the District Gazetteers prepared by Mr. B. C. Allen ICS, from monographs written on the people by well-known ethnographers and sociologists as well as from various Departments of Government, both Central and State. Many Deputy Commissioners and Subdivisional Officers have greatly helped me in supplying such data as are available with them concerning the district. The nature, quality and quantity of the data supplied by each Deputy Commissioner and Subdivisional Officer vary directly according to the interest that each officer has in his district/subdivision.

The preparation of tables was done under the able guidance of Sarvashri J. C. Bhuyan and K. S. Dey, Tabulation Officers, to whom I am greatly indebted. I could not have dictated my write-ups in such a short space of time had it not been for the great help given by my two Stenographers, Sarvashri G. Raghuram and J. Ramsden.

INTRODUCING THE DISTRICT

The district of Nowgong is situated on the south bank of the Brahmaputra river in the Assam Valley. It derives the name from its headquarters, Nowgong, whose original name was 'noa-gaon' i. e. 'new village'. The town itself is situated on the south bank of the Kolong river. Formerly Nowgong formed one administrative unit with Kamrup and Darrang districts. But in 1833, it was formed into a separate district with its headquarters at Puranigudam. Subsequently, the headquarters was transferred to Rangagara and finally to Nowgong in 1839. The district has no subdivisions, but has 11 thanas, namely, Laharighat, Dhing, Rupahihat, Kaliabor, Marigaon, Raha, Nowgong, Samaguri, Jamunamukh, Lanka and Lumding with a total number of 1,832 villages and four towns, namely, Nowgong, Lumding, Hojai and Dhing. The last two have been declared as towns for the first time in 1961. Previously, the district included a part of the Mikir Hills Tract within its boundaries, but this has now been separated to constitute the United Mikir and North Cachar Hills district along with other portions carved out of Sibsagar, Cachar and United Khasi-Jaintia Hills districts on the 17th November 1951. The present Nowgong district covers an area of 2,167 square miles or 5,613 square kilometers according to the Surveyor General of India and 2,200 square miles or 5,698 square kilometers according to the Director of Assam Surveys. It lies between 25°45" and 26°45" North Latitude and 91°50" and 93°20" East Longitude.

The district is bounded on the north by the Brahmaputra river, on the east by Sibsagar and United Mikir and North Cachar Hills and the United Khasi-Jaintia Hills districts and on the west by the United Khasi-Jaintia Hills and Kamrup districts.

PHYSICAL FEATURES

The greater part of the district is an alluvial consisting of a mixture of clay and sand in varying proportions, ranging from pure sand on the banks of the Brahmaputra to a stiff clay which is unfit for cultivation. The district is fringed with low hillocks intersected by numerous rivers and water-courses. The whole district is dotted over with beels and marshes. It may roughly be described as an alluvial

plain bounded on the north by the Brahmaputra and surrounded on the remaining sides by hills.

The plain near the south bank of the Brahmaputra is a low-lying land, slightly undulating and usually covered with tall grass, jungle or reeds, of which there are three main varieties—khagari (*saccharum spontaneum*), ikra (*saccharum arundinaceum*) and nai (*phragmites roburghii*) which are ten to twenty feet in height. The higher land produces ulu (*imperata arundinaceum*) and other kinds of shorter grass used for thatching. In the rainy season the whole area fringing on the Brahmaputra is liable to floods. A major part of this area is called Chapari. People, generally the Nepali graziers, keep large herds of buffaloes and cows on the churs or sand-banks which are continually being formed by the Brahmaputra.

Along the greater part of its course there are numerous densely populated villages on both banks of the river Kolong. The villages are hidden in groves of bamboo and the graceful areca palm trees. Across the centre of this plain stretches a belt of cultivated land from Silghat on the north-east to Jagi on the south-east. But on either side of this belt, cultivation falls off, and there are wide expanses of grassy lands on the north and west, while forests and hills are found on the south and east.

The Kopili valley is a thinly populated area, its settlers being mostly tribals. This belt is a low-lying land, liable to floods in the rainy season. The area beyond Jamunamukh is very sparsely populated and part of this tract is marshy and the rest is rolling savannah covered with grass or low vegetation and is almost destitute of trees. Further east, the valley of Langpher is covered with dense forest. This forest covers the whole of the upper valley of the Dhansiri between the Mikir and the Naga Hills and, in the early days, acted as the most impregnable and effectual barrier to all intercourse between the southern areas of Sibsagar and Nowgong. For full ninety miles the railway runs through a pathless wilderness of trees, a desolate and malarious tract shut in by Hills on either side; but east of Dimapur only a portion of this diurnal forest falls within

the boundaries of Nowgong. South of the Kopili, the belt lying between Dharamtul and the hills is below the flood level and is covered with tall grass and swamps.

The level does not rise continuously from the Brahmaputra to meet the hills which form the southern boundary of the district, but rather slopes towards the west following the general inclination of the Assam Valley. The general appearance of the district is extremely picturesque. On a clear day in winter the view to the north is enriched by the blue ranges of the outer Himalayas behind which snowy peaks shine brightly in the sun, while to the south and east lie range upon range of lower hills the sides of which are clothed with the luxuriant vegetation of a tropical forest. The level rice fields, after the crops is carried home and the stubble alone remains, might perhaps seem tame and uninteresting, were it not for the groves of slender palms and feathery bamboos with which they are broken up. During the rains, this portion of the district is covered with a rich green carpet which gradually turns to gold and on every side are swamps and rivers, hills and woods, to lend variety to the scene.

MOUNTAIN SYSTEM

The two main mountain systems of the district are the Mikir hills on the north and east, while on the south and west are the outlying spurs which project from the Assam range into the Brahmaputra valley. A greater portion of the Mikir hills lies in the neighbouring district of Sibsagar but their western spurs from Kuthari to Dabaka stretch into the Nowgong district. The hills lying south of the Mohandiju and Jamuna rivers also fall within the boundaries of the district. They rise steeply from the narrow valleys with which they are intersected and hill and valley alike are covered with dense forest, except in places where they have been cleared for the shifting cultivation by the Mikir tribe. These hills support a scanty population who grow dry rice, vegetables and cotton on their slopes and are seldom visited by the natives of the plains. The outlying spurs of the Assam range are somewhat lower in appearance and general characteristics and do not differ materially from the Mikir hills. Along with these hills there are many small hillocks which can be seen close to the Jagi Road Railway station and to its north-west, in the Dabaka Reserve Forest, the Lumding Reserve Forest and near Silghat. The heights of these hills range from 272 meters to 853 meters. The Mayang and the Bura Mayang Parbat near the western boundary have a height of about 458 meters. The summit of the Jagi Road hills, known as the Teteliasur Parbat rises

to a height of 272 meters. On the north-east are the Hatimur (186.5 meters) and the Kamakhya Parbat (244 meters) near Silghat which over-look the Brahmaputra. On the latter hill, there is a temple sacred to Durga where sacrifices are still offered to the goddess. There are, besides, other peaks scattered here and there such as Madhpur, Bashundori, Deosal and others which are dedicated to the goddesses Durga and Kamala.

RIVER SYSTEM

The principal river of Nowgong is the Brahmaputra which flows along the whole of the northern boundary and into which all the drainage of the district ultimately finds its way. At Silghat there are rocks and hills to give permanence to the channel. Lower down, the river spreads itself during the rains over the marshy country on either side and, when flooded, the distance between one bank to the other is very great. Between its main banks there is a wide sandy stretch in which it constantly oscillates from side to side for a breadth of about six miles on either side, throwing out here and there divergent channels which, after a time, rejoin the parent stream or get silted up. The river carries with it a heavy quantity of suspended matters and sediments and any obstruction in the current is liable to give rise to an almond-shaped Chapari or sandbank. Subsequent floods may wash this chapari away or may increase its size by fresh deposits of sand, covered with reeds and jungle grass in a few seasons. These operations of alluvium and diluvium are continually being carried on in a gigantic scale by the Brahmaputra.

The north-east corner of the district is drained by the Diphlu, the Gatonga and its tributary, the Deopani. About eight miles north-east of Silghat, the Kolong takes off from the Brahmaputra and, after flowing a tortuous course through the centre of the district, it passes through Kaliabar, Nowgong, Raha and Jagi, and rejoins the parent stream at Kajalimukh about fifteen miles above Gauhati. The upper portion of the river is joined by the Misa, the Diju and the Nanoi (Hari), contributing to the drainage of the north-western slopes of the Mikir Hills. It is connected by a channel with the Kopili which brings to it the drainage of North Cachar and the eastern slopes of the Jaintia hills. The main stream, the Kopili, then turns to the west and after receiving the Barpani and the Umiam or Killing, falls into the Kolong at Jagi. A little to the west of Jagi, the Kolong forms the boundary between the districts of Kamrup and Nowgong and not far from its junction with the parent stream, it receives the Digaru on its left bank. The country between the

Brahmaputra and the Kolong is drained by a large number of water courses (jans), forming a network of intricate channels which here and there widen out into beels or swamps, the largest of which are known as Leteri and Sonai. With a total length of 117 kilometers, the Kolong acts as a receiver for the Brahmaputra filling a very important place in the drainage system of the district. During the rains it is navigable throughout its length by boats of four tons burthen and small steamers ply in it from Silghat upto as far as Nowgong Station. Ferries too are maintained at Jagi, Raha, Nowgong and Kuwarital.

Another important river is the Kopili. It has its source in the Jaintia hills and enters the Nowgong district near Khari-khana. It flows a north-westerly course, forming a part of the southern boundary, till a little below its confluence with the Jamuna (near Jamunamukh) it takes its turn to the west, flows past Raha and finally falls into the Kolong at Jagi, after a course of 262 kilometers. The principal tributaries of the Kopili are the Doiang, the Lankajan and the Jamuna on its right bank while on its left, the Kolong, the Barpani and the Umiam or Killing—the latter two being themselves considered as rivers. During the rains it is navigable by boats of four tons burthen as far as Panimur. The river is largely used as a trade route for the southern part of the district.

Note : (1) It is a queer fact that the Kolong river, after its confluence with the Kopili at Jagi and before its junction with the Brahmaputra, is still known as the Kolong. Taking into account the term "river" in its true sense, the Kolong is just a channel which branches off from the Brahmaputra and later on joins with it ; whereas the Kopili, a river of considerable size with its source in the Jaintia Hills, loses its name after its junction with the Kolong.

This may be due to the fact that the Kopili, before being connected with the Kolong by a channel, followed its own course many centuries ago.

(2) The Umiam river which rises in the Khasi Hills is known as the Killing on entering the plains.

BEELS AND MARSHES

The Nowgong district is dotted all over with beels and marshes, many of which have formed in the old beds of rivers which have

changed their courses. Beels are different from marshes in that the banks of beels are high and are often overgrown with trees, besides being long and narrow and often fairly deep. There are many big beels which are sold as public fisheries while many others are used by the villagers for this purpose. Marshes are generally numerous in the Chapari or low land areas near the Brahmaputra. The largest among them are, perhaps the Morakolong and the Kachudhara which have formed in the old bed of the Kolong. The others of lesser sizes are the Lalung, the Garanga, the Pakaria, the Gaukhajua, the Udari Khanagaria and the Haribhanga. These marshes generally teem with fish and are the haunt of birds of every kind and size from the crane, pelican or fish eagle to the snipe and the small kingfishes. The beels and marshes are very pleasant places during the cold weather.

GEOLOGY

In the Nowgong district, only three periods of the geological history are represented in the outcropping surface, namely, the Quarternary, the Tertiary and the Pre-Cambrian. The Quarternary is represented by the recent alluvium of the Brahmaputra, its many tributaries and its branch, the Kolong. The plain is covered by alluvial soil which is mostly loamy and consists of a mixture of clay and sand in varying proportions ranging to a pure sand on the bank of the Brahmaputra. Whether this large alluvial plain is underlain at depth by the Tertiaries has not been proved so far by the geophysical exploration.

Rocks belonging to the Tertiaries are exposed near Lumding. These belong to the Jaintia, the Barail and the Surma series.

Of the Barails near the top, the Kopili stage is exposed. In the Samkherjan, near Lumding, the upper 213 meters of the Kopili stage are seen mostly argillaceous ; light grey clays with ferruginous nodules predominating ; and there are also purple and dark grey shales, carbonaceous shales ; a thin coal seam and several sandstones. Below this bed are sandstones moderately fine-grained but false-bedded with one calcareous band. The thickness is about 122 meters but the base is not seen. The outcrop is marked by warm springs with salt and sulphur.

In an outlier near Lumding, the Barail beds have been reduced by pre-Boka Beel erosion to a very small thickness not more than 457 meters where it is least eroded. They have not been separated into different stages.

Again near Lumding, a large area is occupied by the Surma series. Over large tracts the beds dip very low, with variable

angles making measurement of thickness uncertain. There are probably not more than 792 meters to 914 meters of beds belonging to the Boka Beel stage, the lower Bhuvan series having been overlapped. The base of the series is often a conglomerate made up mainly of large sandstone boulders set in a ferruginous sandy matrix. The rest of the series is made up of very well-bedded silts, sandy shale, clay and alternation of fine laminac of soft fine sand and soft clay. There are many concretions of calcareous sandstone which in places pass into thin bands of calcareous sandstone. Within the series there is locally an unconformity marked by occurrences of a thick ferruginous conglomerate.

The Pre-Cambrian is exposed in the low hillocks described earlier. They form the eastern edge of the Shillong plateau before it sinks below the alluvium. They are composed of gneisses and granite. These older gneisses are uniform in character with white to light grey colours.

GEOLOGICAL STRUCTURE

Structurally, the Lumding and Jamuna valley merit considerations lying as it does between the Shillong plateau on the west and its detached portion to the east. The Shillong plateau and its continuation in the Mikir Hills and further continuation eastward under the recent alluvium of the Brahmaputra and the Tertiaries was affected by a thrust from the Himalayas, as a result of which summits and saddles were formed. The Garo Hills, the Shillong plateau, the Mikir Hills and the Mishmi Hills on the northeast are the summits. The Lumding-Jamuna Valley is a saddle while the portion of the Archaean below the alluvium submerged between Golaghat and the Mishmi Hills is another elongated saddle.

ECONOMIC MINERALS

The granites and gneisses near Jagiroad are at present being quarried for railway ballast and road metals. The clay found in the alluvial tract is used for making household pots and hollowares. Bricks are also prepared from this type of clay in some places. Deposits of limestone are found at Panimur and near the Jamuna river, but are unfortunately somewhat inaccessible and have not yet been worked. There are traces of petroleum in the neighbourhood of Lumding.

SPECIAL FEATURES ON EARTHQUAKES, FLOODS AND STORMS

The frequency of earthquakes in Assam is closely related to the geology of the region. Earthquakes occur in places where the crust

markedly unstable, such as mountain belts of geologically recent origin. One such region is formed by the Himalayan mountains and the Naga and the Lushai Hills around the northern, the north-eastern and the eastern border of the stable peninsular wedge of the Assam plateau. The organic forces which culminated in the rise of the mountains are still in progress, though equilibrium has largely been attained. Adjustments taking place from time to time find expression as earthquakes.

Like the rest of Assam, the Nowgong District has always been subject to earthquakes. The district lies in the zone where severe earthquakes occur. It suffered severely in the great earthquake of the 12th June, 1897, the epicentre of which was in the Shillong plateau. The earthquake did considerable damage to the district. Most of the buildings including the Court building, the Circuit House and the Deputy Commissioner's bungalow were rendered unfit for habitation. The metalled road along the Kolong river was split up and innumerable gaping fissures occurred. There were damages here and there and stretches of roads were shaken down to the level of the rice fields. Some parts of the jail wall collapsed and some minor damages were also seen in the masonry buildings of the district. Though damage to the buildings, roads etc. was severe, the loss of life was fortunately very small; only 3 deaths were reported.

The district also experienced shocks which resulted from the earthquakes of subsequent dates namely, the 9th September 1923, the 3rd July 1930, the 14th August 1932, the 15th January 1934, the 28th July 1947 and the 15th August, 1950.

The earthquake of the 15th August, 1950 with its epicentre at about 200 miles (320 k.m.) north of Sadiya was one of the most disastrous events in the State of Assam. An area of 15,000 sq. miles (38,850 sq. k.m.) suffered the most extensive damages resulting in loss of life and property. As far as this district is concerned, there were considerable changes in the water courses of some rivers, and the after effect of the earthquake was the annual visitation of floods causing vast devastation and untold miseries to the people.

During the last decade i.e. from 1950 to 1960 the district has been suffering greatly every year from floods. Though the flood have become annual visitant since the great earthquake of 1950, the most damaging and severe floods occurred in 1954, 1956 and 1960.

In the middle of June 1954, the district was overrun by a flood which exceeded all

past records. This flood caused damage to aus paddy and jute crops and eroded large cultivable areas. Though it subsided by the end of June, the second visit in the first part of July completely destroyed the few remaining patches of aus paddy and jute crops. For a long time the greater part of Nowgong district was under water. The flood affected many families badly, and many of the riverine inhabitants suffered due to erosion. In some places houses were also washed away. The flood caused a total loss of 12 human lives.

In June 1956 there was a heavy rainfall in the United Khasi-Jaintia Hills and Nowgong districts. The Umtru project recorded a discharge of 65,000 cusecs on the 5th of June in that year. The Kopili and the Barapani rose and submerged large areas of cultivated land in the district and caused considerable damage.

The heavy rainfall of July, 1960, caused the Brahmaputra to rise alarmingly and a greater part of Nowgong was submerged.

The dyke at Kms. 33.2 and 33.4 (miles 20/6 and 20/7) along the Brahmaputra was breached on the morning of the 12th of July 1960. About 6.4 kms. of the road linking Puranigudam and Kothiatali-Amlakhi was submerged and the road was closed to traffic. The Nowgong Majdia Road was closed to vehicular traffic from the 21st September of that year. There was a heavy loss to paddy, jute and other crops ; many people became homeless and large areas were rendered uninhabitable. The flood took a toll of two human lives.

Nowgong is seldom visited by violent and destructive storms though an interval of dry weather in the rainy season is often closed by a thunder shower which is extremely welcome as it at once relieves the oppressiveness of the atmosphere. Hailstorms occasionally do damage, especially to tea gardens but are very local in their sphere of action.

The following statement shows the damage and loss caused by floods and erosions during 1954 to 1960 in the Nowgong district :—

Years	Area flooded in acres	No. of villages affected by floods	No. of families affected by floods	Crop area affected by floods	No. of cattle lost	No. of human lives lost	No. of villages affected by erosion	Area eroded in acres	No. of families affected by erosion
1	2	3	4	5	6	7	8	9	10
1954	7,68,000	744	50,219	1,57,377	430	12	28	3,505	759
1955	2,43,840	579	17,707	12,969	Nil	Nil	12	728	127
1956	2,40,640	390	7,465	52,690	..	2	1	8	10
1957	33,260	50	1,800	2,302	8	Nil	9	333	60
1958	42,240	165	6,776	4,772	Nil	Nil	Nil	Nil	Nil
1959	26,975	185	4,240	1,248	Nil	Nil	Nil	Nil	Nil
1960	1,34,632	467	16,849	..	39	2	82	6,825	346

CLIMATE AND RAINFALL

The climate of Nowgong does not differ materially from that of the rest of the Assam Plains Division. It enjoys the cold winter, pleasant spring and rainy summer. The climate is characterised by a highly humid atmosphere and abundant rains. From the month of October the rain begins to stop, the temperature falls, and the nights are fairly cool and comfortable. But the real winter begins to set in the middle of November and continues till February. During these months the dry and cold weather prevails with the sky remaining clear, the sun bright with less power and the air cool. During the night from December to February fog hangs over the open field, especially in the chapari areas near the Brahmaputra. The dry weather of February is moistened by some unforeseen light showers which sometimes continue for three or four days.

In March the temperature begins to rise and continues to be high up to the month of September. The months of June, July and August are excessively hot, were it not for the copious rains which prevent the temperature to rise. Between the month of May and September the rainfall is fairly heavy, the air becomes surcharged with moisture and the damp heat is very boring. In summer the sky is generally heavily clouded forecasting the approach of the south-western monsoons. The heavy shower of summer is welcomed by the cultivators who are fully dependent on it for their kharif cultivation.

The average rainfall of the Nowgong district does not differ very much in different years. According to the report of the District Gazetteer, the average yearly rainfall in most part of Nowgong is about 1,905 m. m. (75"), but in the Kopili valley it is considerably less, and at Lanka it is only 1,066.8 m. m. (49"). The rainfall of Lanka is phenomenally low compared with the other places of Assam. According to available information, the recorded average annual rainfall of the district during the last decade i. e. from 1950 to 1960 for five selected stations is 1,759.26 m. m.

The following table shows the annual average rainfall during the last ten years :—

Name of centres	Yearly average rainfall of the centres in millimeters	Average rainfall in the district during the last decade
1 Amlukie T. E.	2,008.40 m.m.	
2 Amsoi T. E.	1,291.21 m.m.	
3 Salona T. E.	2,149.35 m.m.	1,759.26 m.m.
4 Sonea T. E.	2,121.58 m.m.	
5 Lumding	1,225.66 m.m.	

Nowgong is to some extent, sheltered from the monsoon by the Khasi-Jaintia and other hills and the annual rainfall over the greater part of the district averages below 1,500 m. m. On the eastern part of the district, however, rainfall varies between 1,500 m. m. to 2,000 m. m. a year.

About 91 % of the annual rainfall is received during the months of March to September. During the last decade the highest rainfall recorded at Amlukie centre in August 1952 was 659.8 m.m.

TEMPERATURE

There are two meteorological observatories in the Nowgong district, one at the Loongsoong T. E. and the other at Lumding. It is more convenient to take the records of temperature supplied by the Lumding station as representative of the district in general. The cold season starts in November when the day and night temperatures begin to fall rapidly. In the month of January the thermometer falls to the lowest point. In 1951 and 1954 the mean daily lowest minimum temperature in the month of January came down to the level of 4.4° centigrade which was the lowest in the last decade. But the mean daily minimum temperature in general for the whole year is 19.4° centigrade. In the month of January 1960 the mean daily minimum temperature in the Lumding Station and in the Loongsoong T. E. were 6.9° and 10.8° centigrade which were the lowest in the last decade. During the last decade, the mean daily maximum temperature recorded in January 1958 at the Lumding Station was 26.0° centigrade which was the highest.

The temperature begins to rise from the beginning of March, reaching the maximum in July, August and September. During these months the mean daily maximum temperature varies from 30.93° to 35.0° centigrade in the Lumding Station, and 28.9° to 32.8° centigrade in the Loongsoong T. E. But the mean daily maximum temperature through the whole year in Nowgong district as a whole varies from 29.1° to 33.4° centigrade.

The high percentage of moisture in the atmosphere with its damp heat makes the weather very unpleasant and irritating during the monsoon period.

The highest maximum temperature in the last decade as recorded at the Lumding station in August, 1953, was 38.3° centigrade.

FOREST

Botanically the forest of Nowgong district can roughly be divided into two divisions, —the tropical ever-green forests, and the miscellaneous forests. The first category includes

those vegetations, such as Ameri, Gonsarai, (Cinnamomum Glanduliferum) Sapa etc. In the second category such species are included the top canopies of which are deciduous, and the middle and the lower canopies are evergreen in character.

There are also many other types of forests such as, mixed type, dry miscellaneous type, wet miscellaneous type, riverine type, savannah type, swamp type etc. They are also composed of many canopies such as top canopy, middle canopy and lower canopy.

(1) The mixed type of forests contain the top canopy species such as Sal (*Shorea Robusta*), Bhamora, Sida (*Lagerstroemia Parviflora*), Jamu, Ajhar (*Lagerstroemia Flos Reginae*), Gomari (*Gmelina Arborea*), Sam (*Artocarpus Chaplasha*) etc. The middle canopy contains species like Kumbi (*Careya Arborea*), Gohara, Sonaru (*Cassia Fistula*), Kuhir, Bandardima etc., with Kako bamboo.

The undergrowths are mostly shrubs and grasses like thatch and hay and these are the lower canopy species.

(2) The dry miscellaneous type of forests contain the species like Gomari, Amari, Bola (*Molus Laevigata*), Bagipoma, Gonsarai (*Cinnamomum Glanduliferum*), Sopa, Sam and Simul (*Bombax Malabaricum*) etc. The differentiation of canopies is not well defined in these types of forests.

(3) The wet miscellaneous type of forests is characterised by evergreen and semi-evergreen species. The top canopy species are Bhelu, Sam, Hollock, Amari, Khokan (*Duabanga Sonneratioides*), Korai (*Albizia Procera*), Jamu and Hatipaila etc.

The middle canopy species are Ajhar, Monaitelaku, Singari, Marhal, Bandurdima etc. and the lower canopies are generally of miscellaneous nature and of moss type.

(4) Riverine type:—In this type of forests there are also two sub-types, i.e., Brahmaputra alluvium, and Jamuna-Kopili valley alluvium types. In the Brahmaputra alluvium the principal species is Simul. The presence of dense grasses of the genera phragmites, imperata etc. associate with Korai, Siris, Jamu, Uriam (*Bischofia Javanica*) etc. The Jamuna and the Kopili valley alluvium contains the mixed type of forests and is composed of trees like Korai, Ajhar, Uriam, Simul, Outenga, Mukhai etc. and also in the well-

drained soils the better species like Sopa, Poma (*Cedrela Toona*), Gonsarai, Amari are to be seen.

(5) Savannah type :—The dry Savannah type occurs in open areas in dry miscellaneous forests and are characterised by species like Ulu (*Imperata Arundinaceum*), Khagari (*Saccharum Spontaneum*) and other grasses.

But the Savannah type is characterised by the availability of the type of grasses like Ikra (*Saccharum Arundinaceum*) and Nal (*Phragmites Roxburghii*) etc.

(6) Swamp type :—This type includes beels and marshes and abandoned river channels. Alpine species are generally associated with this type.

FOREST BELT

The forests of the Nowgong district have been classified into two divisions—the Reserve Forests and the Unclassed State Forests. Reserve Forests have been constituted under provisions made in the Assam Forest Regulation Act VII 1891 by which the following are enacted i.e. (1) Trespassing or permitting cattle to trespass or allowing cattle to pasture ; (2) Causing any damage by negligence in felling any tree or cutting or dragging any timber ; (3) Any fresh clearance under provisions of Section 7 ; (4) Setting any fire in contravention of any rules made by the Government so as to endanger the Forests ; (5) Felling, cutting, girdling, marking, tapping or causing injuries by fire or otherwise to any tree, (6) Quarrying, stem burning for lime or charcoal or collections subject to any manufacturing process or removal of forest product ; (7) Clearing or breaking up of land for any purpose and (8) Poisoning of water or hunting, shooting, fishing etc. in contravention to Government rules.

In 1902-03 the Reserve Forest covered an area of 142 square miles or 9,0880 acres. But at present they cover an area of 221,669 acres (according to Gazette Notification), and 224,263 acres (according to Working Plan computation). However, the area of the Reserve Forest totalling 225,656.51 acres approximately as supplied by the office of the Chief Conservator of Forest may be accepted as genuine.

The Forests Reserves are under the control of a division known as the Nowgong Forest

Division and comprise of the following Reserves :—

1	Sonaikushi	..	13,104	acres
2	Kholahat	..	15,230.5	"
3	Borpani	..	7,840	"
4	Latumai	..	9,216	"
5	Habaipur	..	4,676	"
6	Hojai	..	1,341	"
7	Laokhowa	..	17,076	"
8	Kamakhya hill	..	1,280	"
9	Kukrakata	..	3,936	"
10	Bagsar	..	8,320	"
11	Diju valley	..	5,703	"
12	Suang	..	6,535	"
13	Bamuni	..	384	"
14	Dabaka	..	30,151	"
15	Jamuna Maudanga	..	3,686	"
16	Rajamayang hill	..	2,960	"
17	Kaki (part)	..	32,440	"
18	Lumding	..	55,357.41	"
19	Kamarakata	..	2,685	"
20	Kapitalli	..	721	"
21	Deosur	..	1,450	"
22	Barbari	..	136	"
23	Killing	..	1,107	"
24	Dhuadalani	..	12.5	"
25	Pilkhana	..	310	"
26	Kaziranga (part)	..	(Included in Sibsagar District)	

Total— 225,656.51 acres

Unclassed State Forest is however simply Government waste land and does not necessarily possess any of the characteristics which are usually associated with the expression 'forest'. It may be a sandy chur or a huge expanse of low-lying land covered with high grass and reeds and almost totally destitute of trees. It may be a small piece of arable land, which has been resigned by its former holder and has not yet been settled with any other person; or it may be what its name would naturally suggest, i.e. actual tree forest. In 1902-03 the Unclassed State Forest occupied an enormous area of 3,418 square miles or 21,87,520 acres. But in 1960-61 the area was reduced to 879 square miles or 50,560 acres, as a good portion of the Unclassed State Forest was included in the management of the Mikir Hills District Council.

FAUNA

Like the rest of Assam, wild animals are fairly common in this district also. They include elephants, rhinoceros, bisons (bos-gauros), buffaloes, tigers, leopards, bears, wild pigs, porcupines and different kinds of deer, the principal varieties of which are Sambar (cervus unicolor), bara singha (cervus duvauceli), hog deer (cervus porcinus) and barking deer (cervus muntjac). Elephants are fairly common, especially near the hills, and when the crops are ripening, cause much damage unless the number of herds are regularly kept down. Besides these, there are a large number of jungle cats and monkeys in the forest areas. The rhinoceros which have become scarce now-a-days breed slowly and as the horn is valuable and the flesh priced as food, they present a tempting mark to the hunters. Forty square miles of uninhabited jungle land near Laokhowa have been reserved and constituted as a game sanctuary. Varieties of water birds abound in beels and marshes, some of which are snipes, adjutants, cormorants, black-billed and white-billed storks and the small blue kingfisher. Different kinds of birds are also found in the forests of the district.

HISTORY OF THE NOWGONG DISTRICT

It is doubtful whether the whole of the Nowgong district was a separate kingdom under its own ruler. It has no independent history apart from that of the Assam Valley. According to the Mahabharata and the Ramayana it was originally included in the ancient Hindu Kingdom of Pragjyotishpur and Kamarupa. For many centuries, the history of the district is involved in great obscurity. But recently the research work on Assam history throws some light on it.

The whole of the Nowgong district consisted of several kingdoms ruled by different rulers at the same time such as the Kings of Kamarupa, the Jaintias, the Kacharis, the Bara Bhuyans, the Koches and the Ahoms.

Broadly speaking Assam was known in ancient time as Pragjyotisha and in medieval time as Kamarupa. Modern Assam, including the Nowgong district, is a part of the ancient kingdom of Pragjyotisha. Before discussing the history of the Nowgong district we are to know first something about the country of Pragjyotisha.

Pragjyotisha has been mentioned in the Great Epics of the Ramayana and the Mahabharata. According to the Ramayana, the city of Pragjyotisha was built on a gold

crested mountain called Varaha which was 64 Yojanas in extent and which abutted on the sea "Varunahya". That the country was closed to the mountain is evident from the fact that Bhagadatta, the king of Pragjyotisha, is called Sulajaya in the Mahabharata. Bhagadatta recruited his troops from the Kiratas, the Cinas and the dwellers of the marshy region near the sea. The Kirata most probably was the genuine name of the Mongolian people and the name Cina was perhaps applied to the Tibetans and the Bhutias. Those who lived in Sayananupa (near the sea) were evidently the people living in the marshy region of Sylhet, Mymensingh and Tripura.

According to the Kalika Purana, the name of this land was changed from Pragjyotisha to Kamrupa as soon as Naraka of Mithila became king and was placed in charge of the temple Kamakhya. Dr. Kakati opines that the term Kamrup (Kamakhya) symbolised the new cult and in exaltation of it, the land itself was renamed. According to the Puranic legends the name Kamrupa is associated with Kamadeva.

The family of Pusyavarman constituted the first historical dynasty of the Bhauma Naraka family said to have ruled in ancient Assam in 325 A. D. In the Allahabad pillar inscription of Samudra Gupta between 330—380 A. D., Kamrup is mentioned as a foreign kingdom along with Samatata, Nepal, Kartipur and Davaka. According to some historians, Pusyavarman was the contemporary of Samudra Gupta, and Davaka was another frontier kingdom in the Kopili valley. Both the countries might have submitted to Samudra Gupta though their autonomy remained unimpaired.

Pusyavarman was succeeded by his son Samudravarman between 380—405 A. D. According to the Nidhanpur grant of Vaskaravarman, the second king Samudravarman, saw no anarchy and so K. L. Barua says that after such anarchy was ended Pusyavarman rose to power. But after Samudravarman, Balavarman I came to the throne and ruled from 405 to 420 A. D. The Nidhanpur grant says that the third King Balavarman defeated many enemies, but who those enemies were was not mentioned. Though the rulers of the Varman dynasty ruled over Nowgong on the bank of the Brahmaputra, the southern portion of the Nowgong district such as Davaka was independent. It may be conjectured that Balavarman tried for the conquest of Davaka but he could not have been successful since his triumphs are described in the vague and most general terms. According to Dr. P. C.

Choudhury there is a valid ground to prove that his immediate successor, Kalyanavarman, conquered Davaka between 420 B. C.—40 A. D.

Bhutivarman was the fifth ascendant from the Vaskaravarman line who ruled probably towards the end of the fifth century A. D. According to the Badganga inscription, Bhutivarman donated land to the 205 Brahmins on the bank of the Kosi river. This is also confirmed by the Nidhanpur grant of Vaskaravarman. It also shows that the kingdom of Kamrup extended at this time from the present Purnea district of Bihar to the extreme eastern part of the Nowgong district. In the 7th century Huen Tsang found in the northern portion of the Nowgong district hundreds of Deva temples with myriads of professed adherents of different Hindu cults. During this period the country was included in the kingdom of Kamrup.

The Nowgong copper-plate inscription of Balavarman which was found in the village of Sutargaon near Puranigudam, states that Balavarman granted lands to the Brahmin Srutidhara in Hensiva lying within the Visaya of Djjina at Dinajpur in North Bengal. He was the last dutiful and energetic ruler of the Salastambha line, managing the affairs of the administration with a well-organised government machinery. But his successors were very weak and the downfall of the Salastambha dynasty came rapidly. The immediate successors of Balavarman are as yet unknown. The Borgaon grant of Ratnapala reveals that there were 21 rulers of the family of Salastambha, the last king Tyagasinha who may have ruled between 970 to 990 A. D.

In 990 A. D. Brahmapala ascended to the throne of Kamrup and established a new line of the Palas. The origin of the founder of the Pala line is given in the grants of the family, indicating that Brahmapala was of the same Bhauma dynasty, to which Pusyavarman and Salastambha belonged. The extension of the Kamrup territory during the reign of Brahmapala in the east included the greater part of modern Assam including Nowgong. He was succeeded by his son Ratnapala. It is evident from his Bargaon copper plate inscription that Ratnapala had the credit of building a new fortress in the capital town named Durjaya (impregnable). The location of Durjaya has been a long disputed question among the scholars. R. M. Nath and some other scholars are firmly convinced that Durjaya is no other than the present Jogijan near Hojai. According to the Kalika Purana, Durjaya was the capital city of the Pala kings and the recent discovery of temples and palaces in that area built by Ratnapala (1000-1030), Indrapala (1030-1055) and Dharmapala (1090-1115 A. D.) proved that the present Jogijan is in Durjaya.

According to Ratnapala's Soalkuchi plate, he donated lands to the Brahmans in the Kullang region in the present Dhing circle where they still exist in Burahgaon—the ancient Briddhagrama. His son Purandarapala married a princess of the country which was conquered by Parasurama. His grandson Indrapala, a Varahi king, made a gift of a plot of land including the Sabriddhagram which is mentioned in the Gaukuchi plate. The last important Pala ruler was Dharmapala (1090 to 1115 A.D.). Dharmapala also granted land in Briddhagram where there was a temple of Madhusudan. According to his Burahgaon copper plate inscription, he was not a worshipper of Mahadeva. He made his grants to Brahmans who worshipped Madhava. Pandit P. Vidyavinod surmised that Dharmapala became a Vaisnavite in the later part of his reign which fact was confirmed by the presence of many Vishnu images along with Siva lingams in Gosainguri, Mikir Ali and Daboka. He was succeeded by Jayapala, the last Pala king in Kamrup.

Ramapala the king of Gauda conquered Kamrup during the reign of Jayapala and after the conquest of Kamrup a man named Tingyadeva ruled Pragjyotishpur as a tributary king under him. Tingyadeva ruled after the Pala dynasty in Assam. According to the Kamauli grant of Vaidyadeva, when Ramapala died, Tingyadeva rebelled against his lord and so Kumarapala of Gauda, son of Ramapala, sent Vaidyadeva for suppressing the rebel. Vaidyadeva crushed the rebellion and became king in his stead in 1131 A.D. Vaidyadeva was succeeded by two other kings after whom came Prithu. During his reign the first Muhammadan invasion under Mahamad Bin Bakhtiyar took place in 1206 A. D. which was successfully repulsed.

In 1226 A. D. the second Muslim invasion of Kamrup under Ghiasuddin Iwaz took place. According to the Gachtal inscription of Nowgong, the invader advanced up to that region but was defeated and fled to the west.

Prithu was succeeded by Sandhya. During his reign the third Muslim invasion of Ikthiyaruddin Yuzbak took place in 1256-57. Yuzbak was defeated and only a few of his soldiers could escape. Sandhya shifted his capital to Kamata not only owing to the fear of repeated Muslim invasions but also on account of the fact that the Ahoms from the east began to push westwards in the beginning of the second quarter of the 13th century A. D.

In the meantime a king named Arimatta of the Jitay family came from the north of the Brahmaputra and conquered Nowgong. He extended his territory up to Majuli. It can

be ascertained from the fort known as Jongalbalahugarh, which was found in the Sahari Mauza in Nowgong district, that Jongalbalahu, another son of Arimatta, was the ruler of that area after him. He is said to have been defeated by the Kacharis and drowned himself in the Kolong river. The Hindu families began to decline, and many small principalities were founded by the Ahom, the Kacharis, the Koches, the Khasis, the Jaintias and the Bhuyans in the 13th century A. D.

In the 14th century, the son-in-law of the Bihali king, established kingdom at Barhampur near Nowgong and extended his kingdom up to Sonapur.

To get rid of the troubles created by the Bhutias, two descendants of Chandi Barbhuyan came to the south bank of the Brahmaputra and settled at Batadraba in Nowgong District where his great grandson Sandara Deva was born.

SHORT HISTORY OF THE KACHARIS

Riv. Sidney Endle in his account of the Kacharis described the Kacharis as "The original autochthons of Assam". According to B. C. Allen's District Gazetteer "these Kacharis belong to the great Bodo tribe which is found not only in the valley of the Brahmaputra, but in the Garo Hills and in Tippera, south of the Surma Valley. They are thought to be a section of the Indo-Chinese race whose original habitat was said to have been located in the inaccessible hills and valleys which conceal the sources of the Yang-tse-kiang and the Ho-ang-ho, and seemed to have gradually spread in successive waves of immigration over a great part of what is known as the State of Assam. According to the history of the civilization of Assam, the Bodos were once a very dominant people of the valley, and petty kingdoms like those of the Kacharis and the Chutias were established by them even before the intrusion of the Ahoms. Remnants of their political domination, after the extinction of Hindu kingdoms and of their culture, may be noticed from the names of places, particularly rivers. The important members of the group of the present day are the Garos, the Kacharis, the Chutias, the Rabhas, the Koches, the Lalungs, the Meches, the Hajongs, the Hojais, the Dimasas and others whose common language was Bodo or Boro. Some of them got mixed up with the Shans at a later time."

According to Fisher, the Kacharis of North Cachar believed that they once ruled in Kamrup. On the other hand Mr. Dundas quotes a prayer used by the Dimasas or Kacharis of

the North Cachar Hills which supports the view that the tribe came from the north-east. It refers to a huge Peupul tree growing near the confluence of the Lilao (Brahmaputra) and the Sagi. Their population of the Kacharis increased greatly in numbers and thence they travelled by land and water till they reached Nilachal, the hill near Gauhati. From Gauhati they migrated to Halali and finally settled at Dimapur.

Captain Fisher was of the opinion that the Bodo gradually acquired an empire over Assam, Sylhet Mymensingh and the valleys to the east of the Brahmaputra.

But there is no other written record of the Kachari rule of the early period. The only trustworthy information regarding their past history is contained in the histories which deal primarily with the history of the Ahoms.

The early history of Tripura (the Rajamala) mentions the ancient Tripura Kingdom in the Kopili Valley. It states that during the reign of Naraka in Pragjyotisha there were two independent kingdoms of the Kiratas in its north-east frontier. They were known as Kachari and Tripura kingdoms. The Tripura kings traced their descent from Druhya, the son of Yajuti. It is said that Pratardana, who was the twentyfifth in descent from Druhya, conquered the Kiratas and founded the kingdom, the capital of which was on the bank of the river Kopili. According to the Rajamala, sixteen kings, from Pratardana to Dakshin, ruled over the Jiviga kingdom with its capital on the Kopili Valley.

The study of their history shows that from the early period to the beginning of the 13th Century the Kacharis were occupying the valleys of the Dhansiri and the Kopili, and were ruling over the western portion of Sibagar and the southern and eastern portions of the Nowgong district. The first Ahom invasion against the Kacharis took place in 1490 A.D. in which the Ahom king Suhangpha was defeated and was driven across the Dikhow. But this victory of the Kacharis was not however of a long duration. In 1531 A.D. hostilities were renewed and a collision occurred in the south of the Golaghat Subdivision in which the Kacharis were defeated. In 1536 war again broke out when the Ahoms advanced up to the Dhansiri and in which the Kachari king Detsung was defeated and killed. The Kacharis left Dimapur and the late king's son Madan Kumar alias Nirbhoy Narayan, was installed as a vassal king under the Ahoms at Lakhindrapur in 1545 A.D. King Megha Narayan shifted his capital to Maibong in 1576 A.D. which fact is confirmed of his

stone inscription bearing his name and discovered at Maibong. He gradually extended his territories in all directions.

Megha Narayan was followed by Joso-Narayan Dev in 1580 A.D. Gait states that a silver coin found a few years ago in the neighbourhood of Maibong bears a date equivalent to 1583 A.D. and was issued by Jaso Narayan Dev a worshipper of Hara Gauri i.e., Siva and Durga. It is however clear that the Kachari princes continued to rule in the Kopili valley in feudal capacity and held sway over the greater part of the Nowgong district.

At the beginning of the 17th century, the Kachari king Satrudaman defeated the Jaintia king Dhan Manik who gave two princesses in marriage to the Kachari king and made over his nephew Jasa Manik as a hostage. Soon after Dhan Manik died, Satrudaman released Jasa Manik and made him king of Jaintia. But Jasa Manik resented this and because of his conspiracy, a war broke out between the Ahoms and the Kacharis. The Ahom garrison was destroyed in the battle of Raha. Satrudaman celebrated his success by assuming the title of Pratap Narayan and changed the name of his capital from Maibong to Kutupur. After the death of Satrudaman, Nara Narayan, Bhim Darpa, Indra Ballav, Bir Darpa Narayan, Garudhvaj, Makurdhvaj and Udayaditya came successively to the Kachari throne but there were no important events worth mentioning during their reign.

Just after Rudra Singha ascended the Ahom throne, the Kachari king Tamradhvaj declared his independence. In December 1706 Rudra Singha despatched two forces against Tamradhvaj. The Kachari king was defeated and fled to Khāspur. In the meantime the Ahoms were decimated by fever and dysentery and after demolishing the brick fort at Maibong, returned to their own country.

According to the Moudanga inscription, Tularam Senapati was the last Kachari king whose capital was at Kosomari. Due to some political reasons he entered into a treaty with Captain Jenkins on the 3rd November 1826 A.D. and the Kachari territory was annexed to the British colony. Thus the glorious chapter of the Kachari history came to an end.

The Kacharis were great builders of cities, forts tanks, and temples, traces of which are still found in the Kopili and Jamuna valley. The old ruins of Dimapur, Maibong and Cachar are vivid evidence of their past glories of arts and architecture. Their ancient capital, Dimapur, is one of the important sites of

megalithic culture. Most of the remains of the Kachari civilization were established before the Ahom invasion in the 13th century A. D. Mr. J. P. Mills points out that there is a close affinity between the Kachari and the Naga culture. The remains of Kosomari and Jamaguri show the specimens of non-Aryan workmanship with Hindu influence. In later times they came under the Hindu influence and many of them were converted to Hinduism. They gave value to education irrespective of sex.

SHORT HISTORY OF JAINTIA

History shows that the Mon Khmer speakers were the original inhabitants of Assam, especially in Khasi and Jaintia Hills. They were one of the branches of Finno-Ugrian or Astro-Asiatic stock. K. L. Barua says that the Mon Khmer were the Pre-Mediterraneans. The Mon Khmer speaking people of Assam have distinctive cultural contribution, such as megalithic burials, neolithic shouldered hoe, terraced rice cultivation, iron smelting and matriarchy, all indicative of advanced culture and civilization.

Dr. Banerjee states that there was a cultural connection between the Finno-Ugrians on the one hand and the Mundas as well as the Mon Khmers on the other. For instance, he shows that ophiolatry (serpent-worship) is still prevailing among the Mundas as well as the Finno-ugrians. There was also a mythological affinity among them.

But when the Mongoloid Tibeto-Burmans came to Assam, they displaced the Mon Khmer speakers. All those displacement took place during the pre-historic period. According to chronology the Tibeto-Burmans were the direct successors of the Khasi-Syntenga and perhaps also other tribes like the Mikirs.

According to Mr. Gait, there is practically no difference between the inhabitants of the Khasi Hills and those of the Jaintia Hills. They are both of the same physical structure, speaking the same language-Khasi-which is the only surviving dialect in India, excluding Burma, of the Mon Khmer family of languages. Language and physical features sometimes undergo tremendous intermixture within a short time. Hundreds of Jaintias in the Nowgong district who have now become Raj-bansis or Saru-Koches are gradually becoming Kalitas.

The study of history shows that there was a kingdom Oddiyana near Lanka ruled by the Jaintia Kings. According to R. M. Nath Oddiyana is no other than the present Hojai area of Nowgong District.

The Jaintias were ruling over the southern portion of the Nowgong district, sometime as feudatories of the Palas of Kamrup and sometime independently. But there is no written record to throw some light on the details of the early period of the Jaintias. In the middle of the 16th century, Sila-Rai, the brother and general of the Koch king Nara-Narayan, attacked the Jaintia Kingdom. In the resultant battle the Jaintia King was defeated and killed and his son was placed on the Jaintia throne by Sila Rai on condition of the former's paying regular tributes.

In the beginning of the 17th century, the Jaintia King Dhan Manik seized Prabhakar, the Chief of Dimarua. The Kachari king came forward to help Prabhakar and invaded Dhan Manik's kingdom in which the latter was defeated and became a feudatory of the Kacharis. He gave two princesses in marriage to the Kachari king and gave over his nephew, Jasa Manik, as a royal hostage.

Soon after the death of Dhan Manik, the Kachari king released Jasa Manik and made him king of Jaintiapur. But after sometime he disregarded his allegiance with the Kacharis and gave his daughter in marriage to the Ahom king Buddhiswarga Narayan alias Pratap Singha (1603-1641) and obtained a grant of some landed properties near Phulaguri on the bank of the Kolong river in Nowgong District.

Jasa Manik was succeeded in turn by Sundar Roy, Chota Partat Roy and Jasamanta Roy. During the reign of Jasamanta Roy (1647-1660), he seized one Ahom trader, whom he released on the representation of the Ahom king. Even so, in return, the latter arrested some Jaintia traders at Sonapur, after nine years this matter was amicably settled.

In 1658 Pramata Roy rebelled against his grand-father Jasamanta Roy, the king of Jaintia. Pramata Roy asked the chief of Gobha for help, but on his refusal, Pramata Roy destroyed four of his villages. The chief of Gobha asked for help from the Ahom King Jayadvaj Singha who established him in Khagarijan near the present Nowgong town.

Thus it is quite evident that some parts in the southern portion of the Nowgong district had been under the Jaintia kings at least from the 12th Century down to 1835. There were many small kingdoms near about Nowgong dependent on the Jaintia kings, such as Gobha, Nelli, Khola, Topakuchi, Barabhujia, Sahori and Phulaguri. The descendants of the chiefs of these dominions

are still known to the local people as Rajahs and they still enjoy the honour and privileges of the villagers. There were many places falling under the Jaintia kingdom for a considerable period till the annexation of Upper Assam by the British Government. Sir A. E. Gait writes in his history of Assam that during the unsettled conditions which prevailed for sometime after the Burmese War, the Raja of Jaintia encroached considerably on the southern border of Nowgong district and between 1830 and 1832 he was repeatedly called upon to remove an outpost which he had established at Chaparmukh without authority. He evaded compliance, but before any coercive measures could be taken, a fresh cause of dispute arose. In 1832, the Raja of Gobha, one of the petty chieftains dependent of Jaintia, acting under the orders of his suzerain, seized four British subjects, three of whom were afterwards immolated at the shrine of the goddess Kali. The fourth escaped and gave information of the occurrence.

On the 15th March, 1835, Captain Lister with two companies of the Sylhet Light Infantry took formal possession of Jaintiapur and issued a proclamation announcing the annexation of the Jaintia Parganas to British territory. A few weeks later, Gobha in the Nowgong district was similarly taken over by a detachment of the Assam Light Infantry. Thus the Jaintia rule in Nowgong district came to an end.

SHORT HISTORY OF THE KOCHES

Koches are one of the members of the Bodo group of Tibeto-Burman family of Mongolian stock which has already been described in the short history of the Kacharis. According to Gait the word 'Koch' is a term of some ambiguity. In Assam proper, it has been known as the name of a Hindu caste, into which are received the converts to Hinduism from the ranks of the Kachari, Lalung, Mikir and other tribes.

The founder of the Koch kingdom was a Mech named Viswa Singha. He rose to power about 1515 A. D. Viswa Singha subdued a petty prince who surrendered to him and founded a magnificent city in Koch Bihar, where he shifted his capital from Chikangram. He was converted to Hinduism and became its great patron. He worshipped Siva and Durga. He revived the worship of the goddess Kamakhya and rebuilt her temple on the Nilachal hill near Gauhati.

When the Kachari kings were defeated by the Ahoms in the Kopili valley and became

feudatory rulers, the northern portion of Nowgong came under the Koch kings of Kamrup. According to the chronicles of the Koch kings, Viswa Singha undertook an invasion of the Ahom territory but retreated. But according to the Ahom chronicles, he visited the Ahom Kingdom as a friend in 1537. Viswa Singha died after reign of 25 years.

He was succeeded by his son Malla Deva in 1534 A. D. who assumed the name of Nara Narayan. He was helped by his brother Sukladvaj. Nara Narayan appointed him as his Commander-in-chief. In this capacity, Sukladvaj displayed such courage and rapidity of movement that he was nicknamed Sila Rai or the Kite King.

Nara Narayan soon came into conflict with the Ahoms when Suhunmung was king. The Koch army under the leadership of Sila Rai advanced up to the Dikrai river where a battle took place in 1546 A. D. The Koches fought with bows and arrows and succeeded in killing some of the Ahom leaders. But the decisive battle was fought at Kaliabar. In 1547 the Koches were defeated and many of them were slain. Nara Narayan was not the man to brook such an insult and in 1562 a fresh attempt was made to overcome his powerful rival. In January Sila Rai advanced with a large force up to Dikhow. He inflicted an overwhelming defeat on the Ahoms and the Ahom king Sukhampha and his chief nobles fled to Charaikharang in Kamrup and the Koches entered the Ahom Capital, Gargaon. After some months peace was concluded and the Ahoms accepted the Koch suzerainty.

Nara Narayan defeated not only the Ahoms but also the Kacharis, the Jaintias, the Tipperas of Tripura and the king of Sylhet and received the submission of the Manipuri king and the chiefs of Khairam and Dimuria. After some years Sila Rai was defeated by the Badshah of Gaur and was taken prisoner. He was soon released, and returned home. A few years later Nara Narayan joined with the Emperor Akbar and attacked Gaur. The Badshah of Gaur was defeated and Gaur was divided between the Emperor Akbar of Delhi and the Koch king. Narayan died in 1584. The reign of Nara Narayan represented the zenith of the Koch power, which, however, declined as rapidly as it had risen.

Soon after the fall of the Koch power Nowgong was harried by the wars between the Ahoms and the Muhammadans.

SHORT HISTORY OF THE AHOMS

The beginning of the thirteenth century brought about a great change in the political

and administrative history of this country along with the entrance of a more powerful clan. In about 1228 A. D. the Man branch of the great Tai race founded the Ahom kingdom of Assam along the Brahmaputra river and they have since been styled as Ahoms in this country.

The original home of the Tais according to Dr. Grierson was "the north-western China between the upper course of the Yang-tse and of the Hoang-ho". But according to George Scott "South-western China" was the original home of the Tais. Although there were linguistic and physical affinity between the Tais and the Chinese, the "History of the southern Princes" by Yau-Tsai says that from the first mention in the Chinese history up to the modern time the Tais have never been called Chinese either by themselves or by the Chinese.

The Tais first migrated to Upper Burma in the valley of Nam-Mao (Sewali river) from their original seat Yan-nan during the sixth century and from thence south-east over the present Shan states and into the Irrawady valley in later times.

Robinson, Hutton and some other scholars believe that the Shans invaded Assam in the eighth century. Dalton in his Descriptive Ethnology of Bengal, 1872, states, "In the reign of Sukhapha, the 13th sovereign of the empire of Pong (777 A. D.), his brother Samlonpha, who was the general of the forces, having subjugated Cachar, Tipperah and Manipur pushed across the hills to the valley of the Brahmaputra and commenced there a series of conquests by which the Shans gradually reduced the whole country."

In about 1228 A. D. a Tai prince called Chao-Sukapha, brother of Mungmau, entered Assam through the Patkoi hills defeating the Nagas on his way and arrived in Kham-jang. After defeating the local chiefs he reached Simaluguri in 1253 where a city was built amid general rejoicings. Sukapha then defeated the Morans and Barahis who were ruling over a narrow strip of territory in Sibsagar and established his capital at the foot of the Charaideo hills. At that time, Upper Assam was ruled by the powerful Chutiyas, a tribe of Bodo group who established their rule after defeating the Hindu Palas of Kamrup. On the west there were the Kacharis with their capital at Dimapur. So the Ahoms had to face frequent wars from 1268-1523 A. D. against the Naras, the Chutiyas, the Kacharis and the Nagas. During the reign of Suhunmung (1497-1539) the Chutiya king was finally defeated in 1523 and his kingdom was annexed by the Ahom

king. Suhunmung also defeated the Kacharis in 1536 and sacked the capital at Dimapur.

In the early part of the 16th century, the Ahoms had to face a new attack from the Koches and the Muhammadans in the west. In 1532 the Ahoms defeated the Muhammadans invader Turbuk on the bank of the Bharali. But in 1546 they were defeated by the Koches at the battle of Kaliabar in Nowgong district. Their final defeat was in 1562 when the Ahom king fled to Namrup and the Koches entered the Ahom capital at Gargaon. The Ahom king Sukhapha was compelled to enter into a peace treaty with the Koches by which he accepted their suzerainty. The Koch power declined with the death of Nara Narayan.

During the reign of Susengpha alias Pratap Singha in 1603-1641, troops were sent up the Kolong to Raha and thence up to the Kcpih against the Kacharis, where they were defeated. Pratap Singha kept a strong garrison at Raha in charge of a Gohain named Sundar. But after some time his mind was poisoned by his son Akhek against the king and he became indifferent to his duties. The Kacharis under Bhim Darpa, the eldest son of the Kachari king, took advantage of the slackness and attacked the Ahom garrison in which Sundar Gohain and many other Ahoms were killed.

In 1615 the Ahoms had to face the Muslim invasion under Said Abu Bakr and Satrajit who advanced up to the Bharali to avenge a murder of a Muhammadan trader at Kaliabar. Though the Muhammadans were at first successful, they were subsequently defeated both on land and water with great slaughter.

Pratap Singha created a new post with the title of Bar-phukan and appointed Langi Panisiya in that post in the conquered provinces west of Kaliabar, and the tract east of Kaliabar was placed under the administration of a Bar-Barua. The first incumbent to this post was Momai Tamuli, the King's uncle.

The Ahoms gained several victories over the Mughals and finally a treaty was concluded between the Ahom General Momai Tamuli and the Mughal Commander, Allayer Khan in 1638 A. D., by which their respective boundaries were demarcated. Pratap Singha's reign witnessed the inauguration of internal reforms and the growing influence of Hinduism.

During the reign of Sutamla or Jayadhevi Singha (1648-1663), the Hindu influence rapidly grew in the Ahom court. He established many shrines (satras) of the Vaishnavist cult and took sramana (saran) from a Brahman

preacher. The important events during the reign of Sutamla were the conflicts with the king of Koch-Bihar and the famous invasion of the Mughals under Mir Jumla, the Nawab of Dacca in 1658. The Koches were defeated. In the meantime the Ahoms took advantage of the confusion that ensued on the deposition of Shah Jahan to extend their influence to the Sankosh in 1658. But three years later they were driven back by the Mughals. In this war they had to face the Mughals in many places and their main engagement took place in Kajal on the mouth of the Kolong, Simaluguri and Kaliabor. In Simaluguri the Ahoms gave a heavy fight but could not withstand. Mir Jumla occupied Gargaon and the Ahom king fled to the Naga Hills. Mir Jumla established himself in the Ahom capital for sometime and refused to enter into any peace agreement offered by king Sutamla. In the meantime, natural calamities occurred and Mir Jumla was compelled to leave the Ahom territory. Disease caused havoc among the Mughals in their waterlogged camp, and the detachment which numbered fifteen hundred men at the beginning of the war was reduced to five hundred. Francis Hamilton in his accounts of Assam says "his army was so roughly handled by the enterprising and warlike Assamese, that he not only was compelled to make a precipitate retreat, but had to yield up a large part of the lands which had belonged to the Muslims before the invasion took place". On the 9th January 1663, a treaty was concluded on the terms of which the Ahom king promised to pay the war indemnity and also to give an Ahom prince as hostage to the Emperor. On the conclusion of peace, the Muhammedans retreated down the valley and suffered greatly while crossing the Kajali plain and the Chaparis. According to the Muhammedan historians, the soldiers had to subsist four days on water. A large number of men lost their lives in the retreat. The later history of Mir Jumla's expedition is not unlike that of Napoleon's ill-fated eruption into Russia. Rain and fever did for the Ahom what frost and snow did for the Russians. In the meantime the Nawab was dangerously ill and he proceeded directly to Dacca; but before his ship reached Dacca, he died on the 30th March, 1663. A few years later, the Mughals again occupied Gauhati. Jayadvaj Singha died in November 1663.

After his death, Supungmung became the head of the Ahom kingdom and assumed the Hindu name Chakradhvaj Singha. During his reign his General, Lachit, defeated the Mughals at Kajali and advanced up to Gauhati, chosen as the head-quarters of the Barphukan. Soon after this defeat, the Mughal Emperor Aurangzeb sent Ram Singha with a huge army to occupy Gargaon. The decisive battle was

fought at Samighat between Ram Singha and Lachit Barphukan. Mughals were defeated and were forced to leave Assam.

After the glorious chapter of the Ahom history, there was a period of confusion and chaos, and internal revolts took place for about eleven years from 1670 A. D. to 1681 A. D. The Mughals, taking these advantages, re-occupied Gauhati.

With the accession of Sukapha alias Godadhar Singha in 1681 A. D. the period of chaos and confusion in the Ahom kingdom came to an end. He expelled the Mughals out of the Ahom kingdom and he was the first Ahom king who definitely annexed Kamrup to his territory. This was the last attempt of the Mughals on Assam.

The zenith of the Ahom power was reached in the reign of Godadhar Singha's successor, Rudra Singha alias Sukhrungpha (1695 to 1714 A. D.) who founded a capital at Rongpur and waged successful wars against the kings of Cachar and Jaintia. The Kachari king Tamaradvaj boldly asserted his independence. Rudra Singha was not a king to tolerate such an insult. He at once deputed Bar Barua to enter the Kachari kingdom by the way of the Dhansiri, while Pani Phukan marched via Raha and the Kopili Valley. They occupied the Kachari capital, Majbong, and Tamaradvaj fled to Bikrampur. On his way to Demara, Pani Phukan conquered and occupied many places including a temple of the goddess Kamakhya. In the meantime the Ahom troops suffered greatly from the pestilential climate and returned to Raha after demolishing the brick fort at Majbong.

Rudra Singha attacked the Jaintia king, Ram Singha in 1707. The latter was defeated and became a captive. Rudra Singha proposed to invade Bengal and accordingly he began to make preparations. But before the completion of his preparation he was seized with a mortal illness and died in 1714. In his old age he decided formally to embrace the Hindu religion and became an orthodox Hindu. He tried to obtain co-operation of the Hindu states to establish a Hindu confederation against the Mughals in the eastern zone of India. He had brought many changes to the social, religious and political life of Assam.

After his death, no major events happened either during the reign of Siva Singha or of his two brothers, Promatta Singha and Rajeswar Singha.

By the middle of the 18th century the Ahom power began to decline. During the

reign of Lakshmi Singha (1769 to 1780) the famous Moamaria Insurrection broke out lasting for more than thirty years and covering the reign of three kings. The cause of this insurrection was deep-rooted, mixed with religion and politics. The strength of the hostiles increased day by day and the royal troops were defeated on many occasions. In the end, however, the Moamarias were defeated and were very cruelly dealt with.

Lakshmi Singha was succeeded by his son Gaurinath Singha (1780-1795 A. D.). During his reign, the Moamaria insurrection broke out again with increased violence. At first the royal troops met with some measure of success and orders were issued outlawing the rebels and authorising any person to kill any Moamaria he might meet, regardless of time, place, sex or age. According to the Ahom chronicler "The villagers thereupon massacred the Moamarias with their wives and children without mercy". The rebels in their turn were not slow to make reprisals. They plundered the country on every side and "the burning of villages appeared like a wall of fire". The ordinary operations of agriculture were suspended, no harvest could be raised and famine killed those whom the sword had spared. "The price of a kotha of rice rose to one gold mohur and men starved in crowds under the trees, forsaking their wives and children." In 1786, the rebels under one Bharat Singh inflicted a decisive defeat upon the Ahom troops and took the capital Rongpur by storm and the king had to fly to Gauhati. The desolation of the country brought about by the Moamarias is thus described by the Ahom chronicler "The Mataks harried the temples and the idols of the gods and put to death all the sons and daughters of our people. For a long time our countrymen had no homes, some took shelter in Bengal, some in Burma, some in the Dafia hills". At last, the Ahom king having thrown himself on the protection of Lord Cornwallis, a small British force was sent to his assistance under the command of Captain Welsh. Rongpur was re-occupied in 1794 and Gaurinath Singha was restored to the throne. After his death, he was succeeded by his son Kamaleswar Singha in 1795. During his reign, the Daffas crossed the Brahmaputra and attacked the royal force near Silghat, but were repulsed with considerable loss. The free booters of Bengal occupied North Gauhati but they were also defeated by the Ahoms at Pandughat. The dispute broke out in 1803 between the Ahoms and the Kacharis, when the latter occupied the country between the Mikir Hills and the Jamuna river. The Ahoms marched from Raha to Jamunamukh and pushed back the combined force of the Kacharis and the Moamarias.

The enemy gave a heavy fight near Nowgong and gained a complete victory over the Ahoms. The Ahom troops fled to Gauhati.

After sometime the Ahoms again marched to Nowgong and fought against the Moamarias. The Moamarias fled down the Kolong to Raha. The Ahom force, after driving them from Raha, proceeded up to the Jamuna to Dobaka and defeated the Kacharis and the Moamarias in 1805. The final victory over the Moamarias and the Khamtis were also achieved afterwards.

In 1809 Kamaleswar Singha was succeeded by his brother Chandra Kanta Singha alias Sudinpha who saw the complete downfall of the Ahom dominion. Due to the growing confusion and suspicion among the Bar Phukan or Viceroy of Gauhati, and the Buragohain or Prime Minister, Barphukan fled to Calcutta and thence to Burma. At the beginning of 1816 A. D. the Burmese invaded Assam and a battle was fought at Ghiladhari in which the Burmese were victorious. The Ahom king fled to Gauhati. The Burmese, known in Assam as 'Maan', invaded Assam for three times with the intention of retaining their hold upon this country. In 1820 Chandra Kanta Singha fled to Goalpara and from the British territory began a series of abortive attempts to recover his lost kingdom. B. C. Allen in his District Gazetteer of Nowgong says that the Burmese were guilty of gross atrocities during their occupation of the country. Villages were plundered and burnt, and the people were compelled to seek shelter in the jungle. Such was their terror of the Burmese that it is said that parents would kill a crying child if it could not easily be pacified. Women who fell into their hands were violated with every circumstance of brutality, and the misery of the unfortunate Asamese was extreme. Fifty men were decapitated on the banks of the Kolong river, in revenge for the opposition offered to the Burmese army before Gauhati and about two hundred persons of both sexes and all ages were imprisoned in a grass and bamboo shed and burned alive".

The State being in such a deplorable condition, king Purandar Singha asked for help of the East India Company. "He was prepared either to pay tribute or to cede a part of his kingdom if British troops assisted him in regaining his throne". But the British Government refused all request because of their non-intervention policy. In the meantime, a conflict arose between the British and the Burmese and in 1824 they declared war against the Burmese. The Burmese evacuated Gauhati without striking a blow. Then they fought in Nowgong and Sibsagar but could not stand.

Rongpur was occupied by the British in 1825. In the following year on the 24th of February, 1826, by the treaty of Yandabo, Assam was annexed to the British territory, without any consultation with the king and the people of Assam.

The people of Assam and the members of the ruling class, the nobility, whose ancestors had ruled Assam for more than six hundred years could not tolerate such action of the British and rebellions broke out between 1827 to 1830. Rebellions spread from the Khasi Hills to the Singpho Hills. Gamdhar Kongor, Peoly Barphukan, Jewram, Moniram Dewan and many others had to sacrifice their lives for the cause of freedom. After some years a treaty was concluded between the British and the Assamese by which Purandar Singha was reinstated on the 2nd of March 1833 as a vassal king. In October 1838 Purandar Singha, being humiliated by the British, abdicated his throne and the British annexed Assam to their territory. Thus the chapter of the Ahom history came to an end.

Passing into the British hands, Nowgong was first administered with Kamrup and Darrang. But in 1833 it was formed into a separate district with its headquarters at Puranigudam and subsequently at Rangagara. But in 1839, the headquarters was again transferred to Nowgong. In 1898, a large part of the Mikir Hills was transferred to Nowgong ; but in November 1951, the Mikir Hills tract was separated from the Nowgong district to form the new district of "United Mikir and North Cachar Hills".

ANTIQUITIES OF NOWGONG DISTRICT

Nowgong District contains innumerable big tanks and ruins of temples, forts and buildings which were supposed to be constructed between the period of 600 and 1200 A. D. About seventeen places having archaeological importance have so far been explored. Many of them are discovered by Sri R. M. Nath. There are enough remains of antiquities which will bring light of the ancient period if they are systematically examined. Some old shrines were dedicated to different deities and some of the specimens indicate strong non-aryan influence. The following are the antiquities of Nowgong District :—

(1) Moudanga : This place is situated about ten miles east of Dobaka on the bank of the Jamuna river. There is the Math-Bari or temple-house near the village. This area contains ruins of several temples and tanks. There are seven mounds containing bricks and stones.

Two pairs of vertical door-beams of stone with snake and foliage decorations on the top and "dwarapals" on the bottom of each can be seen. The sculpture can be compared exactly with the type found on the Bamuni Hills at Tezpur.

In another stone there is an image of "Ardha-Nariswar" in the centre of the lower panel with a lion and a bull at his feet and two flying "Vidyadharas" on both sides at the top. On the top panel there is the image of "Maha-Lakshmi" in the centre with elephants on both sides pouring water from the pitchers held on their raised trunks. On the right there is an image of Vishnu with four hands holding his usual weapons and on the left are Ganesh and Lakshmi.

A beautiful Siva-Linga in schist stone, intact, seated not on the usual oval yoni-pitham but on a beautiful pedestal, was found at Mikir Ali, Mothor-Bari, and Gosain-Jori.

According to R. M. Nath, the discoverer of this monument, this area was previously included in the kingdom of Tularam Senapati who entered into a treaty with Captain Jenkins on the 3rd November, 1838 A. D.

His capital was at Kacho-mari a place about 12 miles to the east of Moudanga on the bank of the Jamuna river, where "an infirm, old man clothed in the poorest cotton garb, and looking more like a skeleton than a living being, passed his days in a wretched grass hut, situated on the edge of a tank choked with rank weeds, in the middle of an extensive and poorly cultivated grass plain". According to tradition, the temple Math-Bari and the tank where Tularam had his capital definitely had no connection with the Kachari king or chiefs. R. M. Nath states that the Siva temples at Moudanga, as also the other temples of the Kopili and the Jamuna valley are definitely works of the 9th to the 12th century A. D. and were built long before the Kacharis came to rule over the country.

(2) Kondoli and the Kadali : This place is situated about 12 miles to the south-east of Nowgong. About three miles to the north-east of the Kondoli tea garden, there is the "Baduli-Kurung" or the bats-cave on the Kondoli hill. The cave is a peculiar workmanship of nature. It is understood that the whole of it is full of bats and the local people consider it a place of great sanctity and regard with awe and veneration.

About a mile to the north of the Kondoli hill there is the Bamuni-Gosainthan which consists of a huge rock. Below the rock there are also some small caves which according to R. M. Nath might have proved welcome

shelters for mendicants or siddhas in ancient time. This place is also regarded sacred.

About a mile to the west of the P. W. D. road and opposite the Bamuni Gosain hill there is a place in the middle of the paddy field supposed to have been the residence of Madhab Kondoli, the great Assamese poet of the fourteenth century A. D. who translated the Ramayana into Assamese verse. A century later, Ananta Kondoli, another Assamese writer of great repute, was born in this locality.

On the same range of the hill about nine miles to the east there are ruins of bricks and stone built walls, tanks, drains and temples in several places. Another adjacent hillock, Chapanullah or Champpanulla, contains traces of old forts and edifices by the side of its beautiful waterfall. This place was supposed to be the capital town of a certain king named Hamsadhvaj in some olden days.

(3) Na-Bhanga ruins: The place is situated near Jogijan. Here there is an image lying under a tree and having a crack on the right arm. According to Bhattasali the Na-Bhanga Image is that of Chamunda of the 11th or 12th century A. D. There is no historical record about it. According to the Tnugkhungia Buranyi, Kirti Chandra Barbarua brought an image of Chamunda about the year 1769 A. D. from the Kachari kingdom to the Ahom capital. But when the Moamaria revolution took a menacing turn, the image of Chamunda was also found to have assumed a very grim appearance and it was at once removed to its former place.

According to local tradition, the image was once removed by somebody but was returned again by having it carried on the back of an elephant. About a mile to the north-west of the Chamunda image there is also an image of Ganga in the valley of Kenduguri.

(4) Bhoi-Parbat: This area is situated at a distance of 5 miles east of the Mahamaya hill. There is an image here of Mahisamardini of the Kamarupi sculpture. It is believed that the image belongs perhaps to the early 9th century A. D.

(5) Ganesh-Parbat: About a mile to the east of the Bhoi-Parbat there is an image of Ganesh carved on a big boulder lying at the foot of the Mikir Hills range. The image is 2'6" high 18" wide and 3" thick. The deity is seated on a mouse 14" long and 4" high. The attributes seen in the two right hands are a  and a lotus while in the two left hands, a  and sweets.

(6) Teteli Pukhuri: This place is situated about seven miles to the south-east of the Mahamaya hill. There are seven big tanks; the one known as the Teteli Pukhuri or the Tamarind tank is about a furlong square. On the east bank of the Tamarind tank lies the ruins of an old stone temple. Most of the stones are buried underground. One piece of the front door contains three human figures of gate keepers, the "nartaki" and the "pujarini"; and the other one contains the figures of a king with his body-guard and the umbrella-carrier. The sculptures bear a direct relationship with the Dah Parbatia school of Tezpur and the temple was constructed about the 9th century A. D.

(7) Dighalpani: About 12 miles south-east of the Mahamaya hill there is a small hill-ock locally called Hemtiru on the bank of the Dighalpani river near the present Dighalpani village. The hillock contains a brick-built temple with stone lintels and door uprights. The door contains three sets of images. The central figure is of the standing Vishnu, with the figures of Lakshmi and Saraswati on the left and the right sides respectively.

(8) Changchauki: At a distance of about 2½ miles from Kampur is the village Deorigaon on the left bank of the Kopili. Just opposite to the Deorigaon the village Changchauki is situated. There are some old ruins of an old temple here. One stone door-beam with three human figures engraved at the lower part depicts a "dwarapal", a dancer and a "pujarini". On a slab of stone is engraved an image of a mithun pair (a male and a female in embrace) while one canopy stone has a lotus engraved on it. All these have been kept in the Changchauki "namghar" (prayer house) near the "vedi".

On the eastern part of the village, there is an image of Vishnu on a slab stone with a "sankha", a "chakra", a "gada" and a "padma". Workmanship is clear and fine in gneiss stone of brownish colour.

(9) Kawaimari: The remains from the area reveal the existence of a big temple and include stone pieces bearing various human, animal and floral designs.

(10) Yogijan: This place is situated about six miles off from Jamunamukh. There are three small temples which serve as the gateway to the main shrine.

There are two big Siva lingams with Yoni Pithas and five small Siva temples (Pancha Rudras).

About half of a furlong to the north of the shrine there is a big area bounded on all sides by earthen high walls with a big tank inside. This is locally known as Raj-bari.

According to the Kalikapurana, the Yogijan stream was known as the Bhairava Ganga and the beel was known as the Bhairava Sarobara. The hillock nearby was known as the Durjaya and the two Siva lingams inside the temple are respectively known as Maha Vairava and Sarava Siva.

(11) **Sitajkhala** : This place is situated on the bank of the Killing river at a distance of about $1\frac{1}{2}$ miles to the south of the Assam Trunk Road. There is a hillock here of solid granite stone on which spot there appears to have been a small temple. There remains now only the corner of a cornice with beads cut out of brown sand-stone and one lintel of a door cut out of granite.

(12) **Mahadeocal** : About 19 miles from the Nowgong town, near the Dharamtul Railway Station, there is a village called Mahadeocal where a temple of god Siva is situated. The door of the temple contains three fairly big figures a "dwarapa" with a bow and arrows, and a "pujarini" and a "nartaki" at the bottom of it. The figure of Vasudeva is also depicted. There is also a namghar which is under the care of a villager called deori. The villagers believe that these deories were originally the Jaintias and settled in this part during the reign of the Jaintia kings.

About a mile and a half to the Mahadeocal village there are the remains of an old fort known as "Jangal Garh". According to the legendary history of Assam this was the capital of Jongal Balahu, the son of Arimatta.

According to the Ahom chronicle, there was a strong garrison of the Ahom at Raha. In the later part of the Ahom administration, Jangal Garh was the fort of the garrison of the Ahom soldiers.

(13) **Vasundhari** : This place is situated at a distance of $1\frac{1}{2}$ miles from the confluence of the Barapani and the Kopili which is called the Vasundhar Hill. On the north-east corner of the hill, two images of Ganesh are engraved on two rocks and an image of the goddess Jagatdhatri on the third.

AKASIGANGA

This place lies at a distance of seven miles from Dabaka. There are three lakes on the

hill from which emerges a beautiful waterfall with a drop of about 120 feet. It is known as Akasiganga. On the bank of this fall there are ruins of three stone temples featuring Siva lingam and Yoni-Pitham. There is also a big stone bull—the celebrated Nandi in a crouching posture. These images contain new architectural designs. The pillars are round resembling iron shafts.

MAHAMAYA TEMPLE

About a mile and a half to the east of Dokmoka, there is a small hillock named Mahamaya hill. There is a tank on the east bank of which there is a small stone temple. The western wall contains a human figure seated in a 'padmasana'. There is also one canopy stone with an 'astha-dala padma' carved on it. This was the temple of Durga. Historically this area was under the Kachari king Krisena Chandra whose capital was at Cachar.

BUDA GOSAIN STHAN

On the bank of the Dikharu river there are ruins of a temple constructed with sand-stone known as Buda Gosain Sthan, and though the figures are very small, the workmanship is artistically finished. There are three small figures of Vishnu, Lakshmi and Saraswati. Buda Gosain stands as a synonym for Siva in many places in this part of the country and may not be confused with the King of Jaintia of that name of the sixteenth century.

POPULATION

According to the 1961 Census, the total population figure of the district is 1,210,761 of which 645,690 are males and 565,071 are females. The population of Nowgong is less than that of any other district of the Assam Plains Division. There is an increase of population by 323,806 over the 1951 Census, the percentage being 36.51. The percentage of decennial growth of population for 1911, 1921, 1931, 1941 and 1951 were 15.84, 31.94, 41.35, 15.37 and 36.65 respectively. The period during 1951-61 has shown a marked increase of population compared to the earlier decades with the exception of the previous decade 1941-51. This increase of population in the district is mainly due to (i) better health facilities and the application of modern medical treatment which resulted in the low death rate, and (ii) the influx of people from inside and outside the State, a great number of whom are the refugees from Pakistan. In the present population, the district ranks in the seventh position among the eleven districts of the State.

The density of population in the 1961 Census is 550 per square mile or 212 per

square kilometre as against 403 per square mile in the 1951 Census. It shows that Nowgong has registered a very high increase of density by 147 in the last decade. In density, Nowgong with its 403 persons per square mile stood second to Cachar in the 1951 Census ; but in the 1961 Census the district occupies the top place followed by Kamrup and Cachar with 541 and 514 per square mile respectively. For the earlier decades—1901, 1911, 1921, 1931, and 1941, the density of population per square mile were 118, 137, 181, 256 and 295 respectively. From the above figures it is found that the density of population has shot up at a very rapid speed. During the last 50 years the density has increased by 301.46 percent and in the last decade it has increased by 36.48 percent. After the formation of the United Mikir and North Cachar Hills District, the density of population of Nowgong has gone up higher.

The district of Nowgong has no subdivision but it consists now of eleven police stations namely, Laharighat, Dhing, Rupahihat, Kaliabar, Marigaon, Raha, Nowgong, Samaguri, Jamunamukh, Lanka and Lumding as against ten in the 1951 Census. A portion of 242 square miles has been separated from the Jamunamukh police station to form a new police station of Lanka which has been recognised by the 1961 Census. Nowgong, Dhing, Rupahihat and Laharighat police stations are the most thickly populated areas of the district. The Dhing police station is the smallest, but in regard to density of population it claims the second place among the others. The Nowgong police station with 1,123 persons per square mile in an area of 143.0 square miles is the densest police station and occupies the first place in the district. Rupahihat and Laharighat police stations holding 930 and 731 persons per square mile in areas of 169.2 and 214.1 square mile respectively stand third and fourth in density. Lumding and Marigaon with populations of 160 and 334 persons per square mile in areas of 178.0 and 370.0 square miles respectively are among the sparsely populated police stations. In regard to area, Marigaon claims the first place among the other police stations. Jamunamukh and Lanka police stations with respective areas of 246 and 242 square miles and accommodating 485 and 540 persons per square mile claim second and third places among the bigger police stations. But Lanka is comparatively the more thickly populated area than Jamunamukh and occupies the sixth place in density among the other police stations. Raha police station comprising an area of 178.2 square miles has a density of 571 persons per square mile and stands fifth. Kaliabar and Samaguri police stations with

densities of 418 and 404 persons per square mile cover areas of 164.0 and 217.0 square miles respectively. Lumding police station shows the highest percentage increase of population by 52.92 followed by Marigaon (40.22), Laharighat (39.43), Raha (32.41), Nowgong (32.11), and Kaliabar (30.25). Rupahihat police station registered the least increase of population, but that too is as high as 19.88 percent as against 18 percent of the Dhing police station in the 1951 Census.

According to the 1961 Census, there are four major towns in Nowgong District namely, Nowgong, Dhing, Hojai and Lumding as against the two towns of Nowgong and Lumding in the 1951 Census. Nowgong and Lumding are classified as Class III towns. The former has a population of 38,600 (23,295 males and 15,305 females) and the latter 23,186 (12,935 males and 10,251 females) respectively. Hojai is a class IV town with a population of 12,857 (7,584 males and 5,273 females) and Dhing is a class V town with a population of 6,574 (3,780 males and 2,794 females). The total urban population of the district in the 1951 Census was 43,535 which was only 4.91 percent of the total population. But in the 1961 Census, the total urban population comes to 81,217 which is only 6.71 percent of the total population.

The percentage of urban population recorded are 1.70, 1.80, 2.40, 2.40, 2.59 and 4.91 in 1901, 1911, 1921, 1931, 1941 and 1951 respectively. It shows that urbanisation seems to be very slow as it signifies an increase of 6.70 percent in 1961 against 4.90 percent in 1951. This increase is also mainly due to the declaration of two new towns namely, Hojai and Dhing. If this figure be excluded from the total urban population, the real increase would come almost to the same level during the last decade.

ECONOMIC DEVELOPMENT

The economic position of the Nowgong District is not at all satisfactory in comparison with the other districts of Assam. The per capita income of this district in 1960 was Rs. 261.00. In this regard it occupies the seventh place among the other districts. The Lakhimpur District occupies the first place with the per capita income of Rs. 417.00 and the Garo Hills District occupies the lowest position with the per capita income of Rs. 192.00. The low per capita income of Nowgong is due to its industrial backwardness. Of course, after Independence many small-scale industries have been installed in different parts of the district. The tea industry of Nowgong is not very prominent either.

Nowgong is an agricultural district. The soil of this district is quite soft and sandy and the climate is highly humid and abundant rains accelerate the growth of the agricultural crops and vegetables. The soil varies from pure sand near the Brahmaputra to clay so sticky as to render it utterly unfit for cultivation. The land best suited for the growth of rice is a clay loam Alatin, the most fertile variety of which is called Bherbheria, and is particularly deep and soft. This type of land is found in the lowest part of the rice basin. The rice basin is formed by the area from Silghat in the north-east to Jagi in the south-west of the district, but on either side of this belt, cultivation falls off. The district abounds in water which helps producing good harvest. Pulse is usually grown on the alluvial flats that fringe the Brahmaputra. The low lands are mainly used for the cultivation of jute. The principle crops are rice, jute, rape and mustard, pulses, potatoes, banana, vegetables, arecanut and tobacco. Out of the total district area of 1,408,000 acres, the total cultivable net land area is 636,000 acres in 1960. The cost of cultivation is comparatively low due to the high fertility of the cultivable lands and the natural irrigation from the regular monsoons. The Hojai area of Nowgong District which produces good quality rice may be said to be the granary of Assam.

During the first two Five Year Plans, the Government has given more importance to the agricultural improvement of the district. In the 2nd Plan period, the agricultural schemes were worked out on a seven point integrated-programme laying emphasis on the supply of improved plants and seeds, water supply, crop production, double cropping, reclamation, and proper utilisation of low lands and better farming practices. The seven point intergrated-programme of the Grow-More-Food Campaign for stepping up food production was laid down by the Department of Agriculture in 1949-50. It consists of the following schemes :—

1. Seed Multiplication and Distribution Schemes consisting of the following :—

(a) Multiplication and distribution of seeds for covering the intensive cultivated areas under improved crops.

(b) A district seed farm scheme financed from the State revenue for production of nucleus seed.

(c) Horticultural Development Scheme with district nurseries for the supply of plants, grafts and suckers for fruit plants and a fruit Technological Laboratory at Gauhati for the processing of surplus fruits.

2. Manure manufacturing and distribution scheme consists of the following :—

(a) Production of compost manure from town refuse in municipal areas.

(b) Production of compost manure on a large scale in rural areas which ceased to be eligible for subsidy from the year 1952-53.

(c) Provision of distribution of bone-meal.

(d) Production for distribution of oil-cake.

(e) Arrangement for making sulphate of ammonia available for cultivators.

3. Irrigation Scheme.

4. The Plant protection scheme consists of the following :—

(a) Scheme for the control of pests and diseases in the fields and during storage.

(b) Scheme for the control of wild animals which cause damage to crops in the fields.

5. Application of better farming practices consists of putting across the result obtained in the Research Station and ensuring their adoption by cultivators.

6. Schemes for utilisation of waste lands and mechanical cultivation comprised of the following :—

(a) Land reclamation in selected localities through mechanised cultivation.

(b) The Tea Garden land utilisation scheme.

(c) Utilisation of Tea Garden surplus lands.

(d) Loan Scheme.

7. Double and mixed cropping cultural operations.

Considerable importance were laid down on the increased production of cash crops in the State as a whole.

The staple food crop of the district is rice which in 1960-61 covered 82 per cent of the total net cropped area. Rice falls under four main heads sali, ahu, bao and boro which grow different seasons of the year. The total production of rice in 1960-61 is :—Autumn rice 26,000 tons ; Winter-rice 411,000 tons ; and Spring-rice 20,300 tons covering the total area of 520,629 acres.

Rape and mustard are usually grown in conjunction with shu on the riparian flats. It occupied 7.80 per cent of the total net cropped area and produced 6,400 tons of food grains in 1960.

In the same year, pulse cultivation occupied an area of 34,060 acres of land with a total production of 3,050 tons. Jute plays an important part in fetching a very substantial revenue to the district. Nearly 109,090 acres of land are cultivated with jute producing about 3,350 bales (one bale contains 400 lbs.) of the fibre.

The following statement shows the area and the production of some other crops during the year 1960-61.

Name of crops	Area under cultivation (in acres)	Production (in tons)
Sugar-cane	8,600	8,600
Maize	1,360	70
Potato	3,880	4,600
Tobacco	1,780	390
Banana	3,500	20,920
Fruits	810	3,000
Wheat	180	30
Cotton	120	19 bales (one bale contains 392 lbs.)
Arecanut	3,800	2,296,000 tons
Vegetables	10,770	

Though the production of crops is high, the annual floods cause considerable damage to their cultivation. In 1960 the value of the flood damaged crops was approximately Rs. 10,668,955.

The supply of irrigated water to the cultivated fields is of more importance. During the year 1960-61 about 23,500 acres of land was brought under the minor irrigation scheme as a result of which an additional output of 1,527 tons of rice was obtained.

CO-OPERATIVE MOVEMENT

After Independence, the co-operative movement played an important role in the economic growth of the district. In 1951-52, there were about 45 primary agricultural credit societies with a total strength of 1,530 members. In 1960-61, the number of the societies increased to 694 with a strength of

32,345 members. The primary agricultural credit societies granted advances of short and medium term loans to the cultivators up to an amount of Rs. 10,000 in 1951-52, which in 1960-61 reached Rs. 811,000. The long term loan advanced by the Primary Land Mortgage Bank to the cultivators was Rs. 9,000 in 1951-52 and Rs. 7,000 in 1960-61.

There were 19 primary co-operative marketing societies in 1961 in which about 324 primary agricultural credit societies were affiliated during the period 1955-56 to 1960-61. In the same year the primary co-operative marketing societies served about 3,370 members and conducted the agricultural business of Rs. 117.12 lakhs which is the highest amount in the State. In the 2nd Plan period 15 godowns were set up at different Mundi centres for storing of agricultural crops. There was a proposal for setting up a co-operative jute mill at Nowgong for which the Government of Assam has issued a licence since 1961.

The high lands of the district are covered with the evergreen tea gardens. The tea industry of Nowgong is smaller in comparison to Sibsagar, Lakhimpur and Darrang Districts. The total area under tea is 12,980 acres. In 1958, the district produced about 4,732 tons of tea.

Nowgong is industrially backward. Before Independence, there was practically no industry excepting a few cottage type of industries most of which were small family units. The industrial backwardness is mainly due to lack of financial help, lack of proper guidance, power shortage, irregular supply of raw materials, and lack of commercial outlook.

In order to remove these difficulties and to create an atmosphere for industrial development in the district, Government have undertaken the implementation of the following schemes :—

- (1) Training programme.
- (2) Financial assistance.
- (3) Supply of raw materials.
- (4) Hire purchase of machineries.
- (5) Power subsidy.
- (6) Establishment of industrial estate.
- (7) Technical guidance.

During the last decade the district has made some industrial progress. There are about 68 manufacturing industries with

the total working force of 2,285. About 62 food and kindred product industries are functioning with a total strength of 2,248 workers. About 64 workers are engaged in the 8 forest product industries. Only 7 printing, publishing and allied industries with 434 man power fall under the Indian Factory's Act. There are only 5 metal and metal product industries of which one is producing machineries excluding transport equipment and the remaining 4 are producing transport equipments with 375 man power.

The Government of Assam has established in Jagiroad the Assam Spun Silk Mill for producing eri, pat and muga spun silk and noil yarn. For this purpose the State Government secured the services of a Japanese expert who had considerable experience and knowledge in this line to prepare a detailed Project Study Report and to complete the establishment of the project. Machineries were purchased from a Japanese Firm on deferred payment terms and the Japanese Engineers were engaged to erect and instal the machinery and to train local technicians.

On March 31, 1960, a Government Company styled as the Assam Spun Silk Mill Ltd. was registered with an authorised capital of Rs. 70 lakhs, out of which, consent to issue capital to the value of Rs. 66 lakhs to be wholly subscribed by the Government of Assam was obtained. With the inauguration of this mill on December 18, 1961, the history of Assam's industrialisation turned a new leaf.

The installed capacity in the mill is 3,000 spindles for spun silk and 240 spindles for noil yarn. Noil yarn is a by-product of spun silk. When operated at full two shifts capacity the mill is expected to produce 34,020 kg. spun silk yarn and 22,680 kg. noil yarn.

The machinery installed is capable of producing noil yarn from 7s to 22s and spun silk yarn from 60s/2 to 240s/2.

Marketing of spun silk yarn was started in February 1963. After entering the market, the yarn produced by the mill has received a very warm welcome all over India. Yarn produced in the Assam Spun Silk Mill has successfully gained popularity in Bhagalpur, Banaras, Calcutta, Ahmedabad, Bombay and some parts of Southern India and Kashmir. Eri and Muga have been spun into such fine yarns for the first time.

From the present trend of the sales of the mill's products and their conversion into silk fabrics, it appears that the mill will

considerably strengthen the silk supply of the State and the Union.

Up to 1961-62, the State Government has subscribed to the share capital of the Company to the extent of Rs. 25 lakhs in addition to giving a loan of Rs. 10 lakhs

The Government of Assam has already issued in 1960 a licence to the India Paper Mill Ltd. to establish a paper mill near Lumding which will produce paper pulp of 6,000 tons annually. In 1961 another licence has also been issued to establish the Assam Co-operative Jute Mill at Nowgong with an annual installed capacity of 9 lakhs of gunny bags and other products.

FISHERIES

After Independence, the Government has given more importance for the development of fisheries in the district of Nowgong. The Fishery Department is primarily concerned with increasing the fish production in the State through artificial breeding. With its immense natural resources, the Nowgong District plays a vital role in fishery products. At present the district is in a position to supply fish and fish products to the consumers not only of Nowgong but also to those of other neighbouring districts. There are about 140 natural fisheries under the Revenue Department. Besides these, there are some small fisheries which are leased out by the Anchalik Panchayats while still smaller ones are left out for local consumption.

In addition to these fisheries, the Fishery Department has taken up the development of the fishery schemes in this district since 1950. During the First Five Year Plan period the Raha Demonstration Fish Farm covering a water area of 40 bighas and the Kathjatali Fish Seed Collection and Distribution Centre covering an area of 10 bighas were established. Besides completing the above two projects, the renovation work of Jongalbalahugarh, Barpani Tank, Bhalukmari Tank and Jorapukhuri Tank were started on phased basis under the "Renovation of old and ancient tanks to convert them into fisheries" scheme.

During the Second Plan period, projects started in the First Five Year Plan were completed and the following three new schemes were taken up.

- (1) Organisation of co-operative societies.
- (2) Reclamation of derelict fisheries.
- (3) Survey.

The main work of the Organisation of Co-operative Society Scheme was to organise co-operative societies. Under the Reclamation of Derilict Fisheries Scheme, a water area of 640 bighas has been reclaimed, and under the Survey Scheme all the important rivers and beel fisheries have been surveyed.

As regards the achievements of these schemes, 1,650,000 fish seeds were produced and distributed. About 65 acres of water area was brought under pisciculture and 430 maunds of fish was produced. In the Second Plan period the department successfully induced the major carp to breed in confined water by hormone injection. Since then the Fishery Department is producing fish seeds in a large scale and has become self sufficient in the supply of fish seeds for both departmental stocking and private demand.

The forests and forest products also contribute to the economic growth of the district. The forests of Nowgong contain more

than 70 species of timber out of which only about 30 species are generally used for plywood, match, furniture, railway sleepers and carriages, for making wooden boxes and poles for telegraphs, telephone, electric transmission etc. etc. People generally use bamboo and timber for building constructions although at present, iron and steel are used as substitutes. The main use of timber is for railway sleepers. Sal is mainly used for this purpose along with hollock and makai

The forest products form excellent raw materials for paper pulp, paper, rayon factories and board industries. Bamboo and reeds are particularly abundant in the forests of Nowgong which can be used as raw materials for news-print. These materials are also assets for the development of cottage and small-scale industries of the district.

The forest revenue is increasing day by day. In 1960-61 it was Rs. 881,140 as against Rs. 549,471 in 1956-57.

rice mill at Hojai.**

INTRODUCING THE STATISTICS

The All-India Census Publications published by the Union Government contain data only down to the level of a district in some cases, or to the level of a police station in other cases. Data regarding each village cannot be had from the Central Government Census Publications. But the data down to the level of a village are very essential for the purposes of the State Government and the administration in the districts and subdivisions. So for the first time, the District Census Handbooks were compiled and printed for each district of Assam in 1951. The editing and compilation was done by the Superintendent of Census Operations, but the printing and expenditure thereof was borne by the State Government. The District Census Handbooks have become very popular ever since, because they are needed not only by Government and the Deputy Commissioners and Subdivisional Officers, but also by the Local Bodies and the general public. They are absolutely essential for the purposes of delimitation of constituencies, the establishment of Panchayats, the determination of quota of civil supplies, the establishment of police stations and many other administrative matters required by the State Government. It has therefore, been decided that in the 1961 Census also, the District Census Handbooks should be edited and compiled by the Superintendent of Census Operations and printed at the cost of the Government of Assam.

The Primary Census Abstracts given in the 1951 Census will now appear in the form of Village Directories which not only give detailed Census data for each village, but they also give such other informations as the existence of communication facilities, drinking water facilities, educational facilities, Scheduled Castes and Scheduled Tribes and the different categories of workers. The Village Directories also give us the area in acres of each village, if the village has been cadastrally surveyed and if the area figure is available, and they also give us the number of literates and the number of workers classified according to the nine categories of the Standard Industrial Classification adopted by the Government of India. Such informations are furnished for each village and for each block of a ward of a town. Thus the Directory furnishes information on the primary economic acti-

vities of each village or ward of a town and the literacy proportion of the population. This abstract is useful therefore, not only for the State Government and the Local Bodies for their administrative purposes but they are also in great demand by various Ministries of the Union Government like the Ministry of Education, Ministry of Labour and Employment, Ministry of Food and Agriculture and the Planning Commission. These data are also required for all sample surveys, both rural and urban, based on villages or wards of a town. The District Census Handbooks also contain tables on mother tongue, religion and the various tables specially prepared for Scheduled Tribes and Scheduled Castes of each district. Official statistics relating to vital statistics, statistics of household and small-scale industries, administrative statistics and other statistics relating to various activities of Government, especially those connected with the First and Second Five Year Plans, have also been given. There is therefore, no doubt that the District Census Handbooks of the 1961 Census will furnish most of the data that are required for administrative as well as for planning and development purposes.

Before 1951, the population had been classified by religion; but at the 1951 Census, the economic classification was substituted for the classification based on religion. In 1951, the people had been divided into two broad livelihood categories, namely the agricultural classes and the non-agricultural classes, and these two classes had again been sub-divided into four classes each. Each of the eight livelihood classes was again divided into three sub-classes with reference to their economic status, namely—

- (i) Self-supporting Persons ;
- (ii) Non-earning Dependents ; and
- (iii) Earning Dependents

In the 1961 Census, the classification based on livelihood has been done away with and the basis of the classification now is WORK. People have been divided into two classes, the Workers and Non-Workers. The working population has been divided into nine categories of workers namely—

I. Working as Cultivator

- II. Working as Agricultural Labourer
- III. Working in Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities
- IV. Working at Household Industry
- V. Working in Manufacturing other than Household Industry
- VI. Working in Construction
- VII. Working in Trade and Commerce
- VIII. Working in Transport, Storage and Communications
- IX. Working in Other Services

The working population has been classified separately according to the returns relating to occupation and industry. The Indian Census Economic Classification adopted at the 1951 Census was neither a purely Industrial nor an Occupational Classification of the population, but it was a combination of both. There were only 10 divisions and 88 subdivisions of Industries and Services. In the 1961 Census, the National Classification of Industries and Occupations adopted by the Government of India was also used for the Census and there are more than 300 Occupational Families and 300 Industrial Minor Groups for which figures are given for the total population sex-wise. Another unique feature of the 1961 Census is that all these Economic Tables are prepared on the basis of the principal work of a person.

Non-workers have again been classified into eight categories as follows :—

1. A full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business.
2. A person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business.
3. Any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age.
4. A retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work.

5. A beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence.
6. A convict in jail (an undertial prisoner is shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution.
7. A person who has not been employed before but is seeking employment for the first time.
8. A person employed before but now out of employment and seeking employment.

In the 1951 Census, the population was shown according to certain units known as Census Tracts. These Tracts were selected by the Superintendent of Census Operations on an adhoc basis and they may constitute one Police Station, two Police Stations or even three Police Stations and they may also consist of part of a Police Station only. Urban areas of each district were treated as separate Tracts in the 1951 Census. In the 1961 Census, I have taken Police Stations only as units of Census Divisions and so all census data are given down to the level of a Police Station. The exception is that urban areas are treated as separate entities for the Subdivision.

ABBREVIATIONS OR NOTATIONS USED IN THE VILLAGE DIRECTORY

As all details cannot be given in the Village Directory, certain abbreviations and notations were used for the sake of easy reproduction and printing. The following notations were therefore used in the Village Directory.

NOTATIONS

1. Transport and Postal Facilities

(i) Road	}	'R'
Bridle Path		
Metalled Road		
Tarred Road		
(ii) Railway		'Rly'
(iii) Postal Facilities		
Branch Post Office		'BO'
Sub-Post Office		'SO'
Extra Departmental Branch Office		'Edbo'
Extra Departmental Sub-Office		'Edso'
Central Sub-Office		'CSO'

2. Educational Institutions

(i) Primary, Basic, Tol, Muktab, Night, Nursery School	'P'
(ii) Middle School (M.E. & M.V.)	'M'

- (iii) High School or Higher Secondary 'H'
- (iv) Higher Institutions including Colleges 'C'
- (v) Technical Institutions 'T'

3. Drinking Water Supply

- (i) Tanks or Beels 'Tk'
- (ii) Kachha well 'Kw'
- (iii) Pipes and Tube wells or Ring wells 'S'
- (iv) Pucca well 'Pw'
- (v) River, Running Stream or Springs 'Riv'

P. S. Distance of the items are considered up to five miles

4. Bazar Day and Medical Facilities

- (i) Weekly Bazar 'Wb'
- (ii) Daily Bazar 'Db'
- (iii) Dispensaries 'D'
- (iv) Hospitals 'Hos'

5. Veterinary Facilities and whether the village is covered by Community Development or National Extension Service Blocks

- (i) Government Veterinary)
- (ii) Private Veterinary) 'V'
- (iii) Other Methods)
- (iv) Community Development 'Cd'
- (v) National Extension Service 'Nes'

DEFINITIONS

The following definitions used in the 1961 Census are reproduced below for easy reference :

1. Town

For the purpose of the 1961 Census, a town means a Municipality, a Town Committee, or a Cantonment and any other area having the following urban characteristics :

- (i) If the population is not less than 5,000
- (ii) If the density is not less than 1,200 per square mile
- (iii) If the adult male population in non-agricultural livelihoods is at least 75 per cent of the total male population.

2. Village

In Assam a village means a cadastral village where there has been a cadastral survey. In the Plains districts where there has been no cadastral survey, it is taken to be a gaon together with its adjacent 'tolas', 'paras' etc. provided that none of these independent collections of houses are so large or so distant from the cadastral village, with distinct individual names. In the Hills districts, the most convenient definition of a village is that it is a collection of houses bearing a separate name and situated with certain boundaries traditionally recognized by the villagers.

3. House

It is a structure or part of a structure inhabited or vacant or a dwelling, shop, a shop-cum-dwelling or a place of business, workshop, school etc. with a separate entrance.

4. Household

It is a group of persons who commonly live together and take their meals from a common mess or kitchen unless the exigencies of work prevent any one of them from doing so.

5. Scheduled Tribes

They are members of the backward tribes who generally occupy the hilly areas or other rather inaccessible parts of the Indian Union. They are generally very backward and so the Government of India has prepared a schedule of such tribes for the purpose of giving them facilities in education and employment so that they may come up to the level of the other advanced people of India as soon as possible. Scheduled Tribes may belong to any religion.

6. Scheduled Castes

They belong to the lowest rung of the castes of the Hindu and Sikh religions. In order to help them rise to the level of other more advanced societies in India, the Government has made a schedule of such people—hence the name Scheduled Castes.

7. Homeless persons

They are people who have no houses to dwell and generally live in pavements or open places, such as beggars, who beg in people's houses by day and sleep under the trees by night.

8. Institutional populations

They are people who are inmates of institutions, like hostels, boardings, jails etc.

9. Worker

Is a person who is working as a cultivator, an agricultural labourer, at a household industry or he may be doing any other work but he must earn some income. Work includes not only actual work but also effective supervision and direction of work.

10. Non-worker

Is a person who is either not doing any work or who does some work from which he does not earn any income. For example, a pensioner and a rentier who earn some income but if they do not do any other work they are classified as non-workers. On the contrary, students and housewives may be doing some work either in school or in the house but as they do not earn any income they are classified as non-workers for the purpose of the Census.

11. Cultivator

For purposes of the Census a person is working as a cultivator* if he or she is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government, (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

12. Agricultural Labourer

Is a person who works in another person's land only as a labourer without exercising any supervision or direction in cultivation for wages in cash, kind or share, such as share of produce. The labourer should have no right or lease or contract on land on which he works nor should he be responsible for taking decision as to which crops to sow and when or taking the risk of cultivation. A share of the produce goes to him only as wages.

13. Household Industry

A household industry is defined as an industry conducted by the head of the household himself or mainly by members of the household at home or within the village in rural areas and only at home in urban areas.

TABLES

Besides the Village Directory which contains the Primary Census Abstracts for each village in the district in addition to other important informations relating to the village, all A-series tables with their appendices relating to the general population ; all B(i) i. e. General Economic Tables except B-II, all C-series i. e. Social and Cultural Tables except C-I, C-IV & C-VI ; and all tables for Scheduled Castes and Scheduled Tribes are reproduced in this volume. A short explanatory note for each of the above census tables presented in this volume is also given.

TABLE A-I
AREA, HOUSES AND POPULATION

This is the basic population table for the Census. This table furnishes the data for each police station and town separately. The area is given both in square miles and square kilometres, but the density is calculated from square miles only. In addition to the data on area and density, this table gives the number of inhabited and uninhabited villages, occupied residential houses and the population separately for males and females according to the 1961 Census for both rural and urban areas separately.

The area figures of the district and police stations are as supplied by the Director of Land Records and Surveys, Government of Assam. The area figures of the towns are collected from the respective Deputy Commissioners and Subdivisional Officers, Local Bodies and in some cases, from the Local Self-Government Department of the Government of Assam.

Appendix I to Table A-I

This appendix shows the 1951 territories constituting the present set-up of the district. The formation of one new Police Station namely Lanka Police Station is shown in this appendix.

Appendix III to Table A-I

This table furnishes the figures for houseless and institutional population for total, rural and urban areas separately. For the purpose of studying different characteristics, this population is included in the household population.

Note :— 1. The Sq. km. and density figures of Urban areas of Police Station/District are worked out by using the area figures corrected upto 2 places of decimals obtained by adding the areas of towns in the respective units and not using the area figures given in the table. In addition to this, the area figures relating to Sq. km. are further adjusted to make the Police Station/District totals tally.

2. Towns treated as such for the first time in 1961 are printed in italics.

3. The following abbreviations have been used for the status of a town :—

- (i) M—Municipality
- (ii) T.C.—Town Committee

A-I—AREA, HOUSES AND POPULATION

APPENDIX I

Statement showing 1951 Territorial Units constituting the present set-up of the District

- 1 Only those names areas which have undergone changes since 1951 have been shown below
- 2 The Location Code Number revenue number, name and area of each village (whatever available) transferred from one Police Station to another or incorporated in a Police Station by transfer from another is given in the Annexure I

District/Police Station	1951 Territorial units	Details of gains in territories					Details of loss in territories					Net Area (gain +, loss - ')

TABLE A-II—VARIATION IN POPULATION DURING SIXTY YEARS

This table furnishes population data for the last seven Censuses from 1901 to 1961 and the variation of population in each decade. This is a very important table as it gives the growth of population from decade to decade and in the absence of reliable vital statistical data, forms the main source for estimation of population. One of the main changes in this table since the last Census is that percentage variation is given from decade to decade.

District	Years	Persons	Decade Variation	Percentage Decade Variation	Males	Females
1	2	3	4	5	6	7
NOWGONG	1901	260,411	132,605	127,806
	1911	301,655	+ 41,244	+ 15.84	153,938	147,717
	1921	398,087	+ 96,352	+ 31.94	208,731	189,276
	1931	562,581	+ 164,574	+ 41.35	298,585	263,996
	1941	649,072	+ 86,491	+ 15.37	348,099	300,973
	1951	886,955	+ 237,883	+ 36.65	476,578	410,377
	1961	1,210,761	+ 323,806	+ 36.51	645,690	565,071

A-III—VILLAGES CLASSIFIED BY POPULATION

This table gives figures for the number and population of villages in the various population groups which are less than 200, 200-499, 500-999, 1000-1999, 2000-4999, 5000-9999 and 10,000 and above. The group less than 500 of the last Census has been split up into two groups namely, less than 200 and 200-499.

A-IV—TOWNS (AND TOWN-GROUPS) CLASSIFIED BY POPULATION IN 1961
WITH VARIATION SINCE 1901

This table gives the growth of each town since 1901. This table furnishes the areas of the towns of the 1961 Census both in square miles and square kilometres. For the purpose of this table, all towns are divided into 6 classes according to population. As in table A-II, the percentage variation of each town is given from decade to decade.

Class I—100,000 and above
 Class II—50,000-99,999
 Class III—20,000-49,999

Class IV—10,000-19,999
 Class V—5,000-9,999
 Class VI—less than 5,000

District	Name of Town	Status of Town	Year	Area		Persons	Decade Variation	Percentage Decade Variation	Males	Females

B — GENERAL ECONOMIC TABLES

TABLE B-I

WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

This table is prepared separately for total, rural and urban population and it gives the total population classifying the nine industrial categories of workers and non-workers. Each category is divided into five age-groups namely, 0-14, 15-34, 35-59, 60+ and Age not stated. This is the basic economic table. The classification of workers and non-workers by age-groups is a special feature of the 1961 Census. The age-groups correspond to the different stages of life which have special significance with reference to capacity to work, namely, children, young persons, middle-aged persons and elderly persons.

TABLE B-III
INDUSTRIAL CLASSIFICATION OF WORKERS AND
NON-WORKERS BY EDUCATIONAL LEVELS

Part A of this table relates to urban areas only. Each of the nine categories of workers and non-workers is shown by literacy and educational levels. This is an important table as it shows the employment of persons of different educational levels among the various categories of workers. This information may be of much use for the assessment of educational qualification of available man-power.

Part B of this table relates to rural areas. The educational level is confined only to (i) Literate (without educational level), (ii) Primary or Junior Basic and (iii) Matriculation and above.

**B-III PART A—INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY EDUCATIONAL LEVELS

TABLE B-IV

**INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK OTHER THAN
AT CULTIVATION BY SEX AND CLASS OF WORKER**

This table corresponds more or less to the Union Table B-III of the 1951 Census.

It divides the working population, other than persons at work in cultivation, industrially into 9 Divisions, 45 Major Groups, 343 Minor Groups and into four statuses of employment. The Indian Census Economic Classification adopted at the 1951 Census was neither a purely industrial nor occupational classification of the population but was a combination of both. There were only ten divisions and eighty subdivisions of industries and services. The present classification follows the National Classification of Industries adopted by the Government of India with some suitable minor modifications within the framework. This table deals only with the industrial classification of workers. The workers in Household Industries are classified into two employment statuses, namely, Employee and Others. The workers in Non-Household Industries are classified by the four statuses of employment, namely, Employer, Employee, Single Worker and Family Worker against Employer, Employee and Independent Worker in the 1951 Census. An Employer is a person who has to employ other persons in order to carry on the business from which he secures his livelihood. He is not only responsible for his own personal work but also for giving work to others in the business. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others is not an employer, even if he has the power to employ another person (s) in his office on behalf of his own employer (s).

An Employee is a person who usually works under some other person for salary or wages in cash or kind. Persons employed as Manager, Superintendents, Agents, etc. and in that capacity employ or control other workers on behalf of their own employers are only employees.

A Single Worker is a person who works by himself but not as Head of household in a

Household Industry. He is not employed by any one else and in his turn does not employ anybody else, not even members of his household except casually. This definition of a Single Worker will include a person who works in joint partnership with one or several persons hiring no employees and also a member of a Producers' Co-operative. Each one of the partners or members of such Producers' Co-operatives is treated as a Single Worker.

A Family Worker is a member who works without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. For the purpose of this definition, members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The Family Worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relatives.

This table has three parts. Part A restricts itself to an account solely of persons at work at Household Industry. It presents data for employee and others only for major groups separately for total, rural and urban.

Part B deals with the persons at work in non-household industry, trade, business, profession or service by the four statuses of employment only for total and urban. This part of the table also gives data only for major groups.

Part C of the table furnishes data for each minor group of the Industrial Classification in respect of persons at work other than cultivation for total and urban. It does not classify the workers by status of employment.

This is a very important economic table as it gives the employment position in various sectors of the economy.

The Indian Standard Industrial Classification is reproduced below :—

STANDARD INDUSTRIAL CLASSIFICATION

DIVISION 0 : AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING

Major Group	Description	Minor Group
00	Field Produce & Plantation Crops	
	Production of other crops (including vegetables) not covered by production of cereal crops, pulses, fibres, oil seeds, sugarcane and other cash crops	005
	Production of wood, bamboo, cane, reeds, thatching grass, etc	007
	Production of other agricultural produce (including fruits & nuts not covered by fruits and nuts in plantations, vines orchards and flowers) not covered above	009
01	Plantation Crops	
	Production of tea in plantation	010
	Production of tobacco, in plantation	013
	Production of plantation crops other than coffee, rubber, ganja, chinchona and opium	015
02	Forestry and Logging	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production and gathering of other forest products not covered above	026
03	Fishing	
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
04	Livestock and Hunting	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of silk-worms and production of cocoons and raw silk	045
	Production of other animal husbandry products such as skin, bone, ivory and teeth	048

DIVISION 1 : MINING AND QUARRYING

10	Mining and Quarrying	
	Mining of coal	100
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107

Major Group	Description	Minor Group
20	Food-Stuffs	
	Production of rice, atta, flour, etc. by milling, dehusking and processing of crops and foodgrains	200
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oil (other than hydrogenated oil)	207
	Production of other food products such as sweetmeat and condiments, muri, murki, chira, kholi, cocoa, chocolate, toffee, lozenge	209
21	Beverages	
	Production of country liquor	211
	Production of aerated and mineral water	214
	Production of ice	215
	Processing of tea in factories	217
22	Tobacco Products	
	Manufacture of bidi	220
	Manufacture of hookah tobacco	223
	Manufacture of other tobacco products	226
23	Textile-Cotton	
	Cotton spinning (other than in mills)	231
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239
24	Textile-Jute	
	Jute pressing and baling	240
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	Textile-Wool	
	Embroidery and art work in woolen textile	256
26	Textile-Silk	
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope & twine	266
27	Textile-Miscellaneous	
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including rain coats and headgear	273

Major Group	Description	Minor Group
	Manufacture of made-up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
28	Manufacture of Wood and Wooden Products	
	Sawing and planning of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	Paper and Paper Products	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper & paper board—handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	Printing and Publishing	
	Printing and publishing of newspapers and periodicals	300
	All other types of printing including lithography, engraving, block making and other works connected with printing industry	302
	All types of binding, stitching and sizing and other allied works connected with binding industry	303
31	Leather and Leather Products	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Repair of shoes & other leather footwear	314
32	Rubber, Petroleum and Coal Products	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
33	Chemicals and Chemical Products	
	Manufacture of fertilizers	332
	Manufacture of matches	334

Major Group	Description	Minor Group
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)	339
34-35	Non-Metallic Mineral Products Other than Petroleum and Coal	
	Manufacture of structural clay products such as brick, tile	340
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stone images	345
	Manufacture of asbestos products	347
	Manufacture of mica products	348
	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery	351
	Manufacture of glass bangles and beads	353
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by minor group 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357
	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	Basic Metals and their Products except Machinery and Transport Equipment	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of metal products (other than of iron brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (this will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39)	369
37	Machinery (All kinds other than Transport and Electrical Equipment)	
	Manufacture and assembling of machinery other than electrical, except textile machinery	370
	Manufacture of machine tools	372
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	Transport Equipment	
	Manufacture of wagons, coaches, tramway and other rail road equipment other than that covered by structural steel products such as joist, rail, sheet, plate	381

Division 2 & 3 :**MANUFACTURING (Concluded)**

Major Group	Description	Minor Group
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipments such as animal drawn and hand drawn vehicles	389
39	Miscellaneous Manufacturing Industries	
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metal	393
	Manufacture and tuning of musical instruments	394
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399

DIVISION 4 :**CONSTRUCTION**

40	Construction	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical & sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of waterways and water reservoirs such as bund, embankments, dam, canal, tank, tubewell, wells	403

DIVISION 5 :**ELECTRICITY, GAS, WATER & SANITARY SERVICES**

50	Electricity and Gas	
	Generation and transmission of electric energy	500
51	Water supply and Sanitary Services	
	Collection, purification and distribution of water to domestic and industrial consumers	510

DIVISION 6 :**TRADE AND COMMERCE**

60-63	Wholesale Trade	
	Wholesale trading in cereals and pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other food-stuff (not covered elsewhere)	601

Major Group	Description	Minor Group
	Wholesale trading in all kinds of fabrics and textile products such as garments, hessian, gunny bag, silk and woolen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf) coffee (seed and powder), aerated water	603
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in other household equipments not covered above	618
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
	Wholesale trading in paper and other stationery goods	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment, like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipments	633
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in precious metals and stones, gold and silverwares and jewelry	638
	Wholesale trading in all goods not covered above	639
64-68	Retail Trade	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water	641
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in food-stuff like sweetmeat, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textile and hosiery products : (this includes retail trading in piece-goods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, headgear such as hat, umbrella, shoes and chappals	653
	Retail trading in tyres, tube and allied rubber products	654
	Retail trading in petrol, mobiloil and allied products	655
	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and paper	661
	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipments not covered above	664
	Retail trading in bricks, tile and other building materials	670
	Retail trading in hardware and sanitary equipments	671

Division 6 :

TRADE AND COMMERCE (Concluded)

Major Group	Description	Minor Group
	Retail trading in wood, bamboo, cane, bark and thatches	672
	Retail trading in other building materials	673
	Retail trading in agricultural and industrial machinery equipments, tools and appliances	680
	Retail trading in transport and storage equipments	681
	Retail trading in electrical goods like electric fan, bulb	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear	683
	Retail trading in clock & watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone records, pictures and paintings including curio dealing	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	Trade and Commerce Miscellaneous	
	Importing and exporting of goods and commodities	690
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699

DIVISION 7 :

TRANSPORT, STORAGE AND COMMUNICATIONS

70-71	Transport	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Animal transporting by animals such as horses, elephant, mule, camel	704
	Transporting by man such as carrying of luggage, hand-cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by boat, steamer, ferry, etc., by river, canal	706
	Transporting by air	708
	Transporting by other means not covered above	709
	Services incidental to transport such as packing, crating travel agency	710
72	Storage and Ware Housing	
	Operation of storage such as ware-houses	720
73	Communications	
	Postal, telegraphic, wireless and signal communication	730
	Telephone communication	731
	Information and broadcasting	732

Major Group	Description	Minor Group
80	Public Service (This does not include Govt., Quasi Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institutions each of which is classified in the appropriate industry groups)	
	Public service in police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative departments and offices of quasi-government organisation, municipalities, local boards, etc.	805
	Public service in administrative departments and offices of State Governments	809
81	Educational and Scientific Services Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	Medical and Health Services Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakim, unani, ayurvedic, allopathic and homoeopathic practitioners	820
	Veterinary services rendered by organisations and individuals	821
83	Religious and Welfare Services Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, (this includes missions, ashrams and other allied organisations)	830
	Religious and allied services rendered by pandit, priest, preceptors, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity	832
84	Legal Services Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, muhurie, munshi	840
	Matrimonial services rendered by organisations and individuals	841
85	Business Services Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as those rendered by news-agency, newspaper correspondent, columnist, journalists, editors, authors	853

Division 8 :**SERVICES (Concluded)**

Major Group	Description	Minor Group
86	Community Services and Trade & Labour Association	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political and fraternal organisation such as rate-payers' association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens, etc.	862
87	Recreation Services	
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus carnivals	872
88	Personal Services	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafe restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry service rendered by organisations and individuals, this includes all types of cleaning, dyeing, bleaching, drycleaning services	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hairdressing saloon and beauty shops	884
	Services rendered by portrait and commercial photographic studios	885
89	Services (Not Elsewhere Classified)	
	Services rendered by organisations or individuals not elsewhere classified	890

DIVISION 9 :**ACTIVITIES NOT ADEQUATELY DESCRIBED**

90	Activities unspecified and not adequately described (This includes new entrants to the Labour market)	
	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900

APPENDIX TO TABLE B-IV PART C

NOWGONG DISTRICT

Minor groups having less than 1% of workers of the respective Division (Less than 0.5% in case of Minor Groups of Division 2 & 3), have been shown in this appendix.

The following abbreviations have been used :—

HI—Household Industry

NHI—Non-Household Industry

M—Males

F—Females

005 Total NHI (M 10), Urban NHI (M 7) ;

TABLE B-V
OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK
OTHER THAN CULTIVATION

This is a new table for the 1961 Census. As discussed earlier in case of table B-IV, the classification adopted at the 1951 Census was a combination of industrial and occupational. Two separate tables are therefore prepared on the basis of industry and occupation of the workers in this Census.

This table classifies the workers other than at cultivation into 11 Occupational Divisions, 75 Groups and 331 Families according to their occupations. This classification follows the National Classification of Occupations adopted with minor modifications within the frame work. It gives data for each family of the National Classification of Occupations separately for total and urban and for persons, males and females, and thus brings out the distribution of occupations among males and females.

B-V OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

NOWGONG DISTRICT

Families having less than 1% of the workers of the respective Division, (less than 0.5% in case of families of Division 7-8), have not been shown in this table, but are given in the appendix to this table. Divisions thus affected are marked with an asterisk (*).

APPENDIX TO TABLE B-V

NOWGONG DISTRICT

Families having less than 1% of workers of the respective Division (less than 0.5% in case of families of Division 7-8), have been shown in this appendix. The following abbreviations have been used :—

III—In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities

IV—At Household Industry

V—In Manufacturing other than Household Industry

VI—In Construction

VII—In Trade and Commerce

VIII—In Transport, Storage and Communications

IX—In Other Services

M—Males

F—Females

TABLE B-VI
OCCUPATIONAL DIVISIONS OF PERSONS AT WORK
OTHER THAN CULTIVATION CLASSIFIED BY SEX,
BROAD AGE-GROUPS AND EDUCATIONAL
LEVELS IN URBAN AREAS ONLY

This table is prepared only for urban areas and only up to the Division of the National Occupational Classification. The population under each Occupational Division is classified by the five age-groups ; 0-14, 15-34, 35-59, 60+ and Age not stated and further classified according to the broad educational levels. This table is likely to give useful informations about those occupations which attract personnel.

A list of the Occupational Divisions with their descriptions is given at the end of the table.

 7-8—Craftsmen, Production Process workers, and Labourers not Elsewhere
 Classified
 9—Service, Sports and Recreation workers
 X—Workers not Classifiable by Occupation

TABLE B-VII

THIS TABLE IS PREPARED IN TWO PARTS

Part A of this table shows persons working principally (i) as Cultivators or (ii) as Agricultural Labourers or (iii) at Household Industry classified by sex and by Secondary work (i) at Household Industry (ii) as Cultivator or (iii) as Agricultural Labourer.

Part B of this table shows the Industrial Classification by sex of persons working in Non-Household Industry, Trade, Business, Profession or Service who are also workers engaged in Household Industry.

Table B-VII is prepared separately for total, rural and urban population. Part A of the table is a cross tabulation in the case of persons whose principal and secondary works are any two of (i) Cultivation, (ii) Agricultural Labour and (iii) Household Industry. This table is important as it shows the extent to which cultivation is supplemented by household industry or vice versa.

Part B of this table gives data in the case of persons who are principally engaged in Non-Household Industry etc. and also engaged in Household Industry as a Secondary work

Divisions and Major Groups appearing in the table are described below :

DIVISION 0 : Agriculture, Livestock, Forestry, Fishing and Hunting

Major Group 00 : Field Produce and Plantation crops

„ „ 01 : Plantation crops

„ „ 03 : Fishing

„ „ 04 : Livestock and Hunting

DIVISION 1 : Mining and Quarrying

Major Group 10 : Mining and Quarrying

DIVISION 2 & 3 : Manufacturing

Major Group 20 : Foodstuffs

„ „ 23 : Textile-Cotton

„ „ 24 : Textile-jute

„ „ 25 : Textile-Wool

„ „ 27 : Textile-Miscellaneous

„ „ 28 : Manufacture of wood and wooden products

„ „ 31 : Leather and leather products

„ „ 33 : Chemicals and chemical products

„ „ 34-35 : Non-Metallic Mineral Products other than Petroleum and Coal

„ „ 36 : Basic Metals and their products except machinery and transport equipment

„ „ 39 : Miscellaneous Manufacturing Industries

DIVISION 4 : Construction

Major Group 40 : Construction

DIVISION 6 : Trade and Commerce

Major Group 64-68 : Retail Trade

DIVISION 8 : Services

Major Group 81 : Educational and Scientific services

„ „ 82 : Medical and Health services

„ „ 88 : Personal services

„ „ 89 : Services (not elsewhere classified)

TABLE B-VIII

This table shows the persons unemployed aged 15 and above by sex, broad age-groups and educational levels.

Part A of the table relates to urban areas. This is a classification of unemployed persons by their educational levels and age-groups. This is prepared separately for those who are seeking employment for the first time and for those who were employed before but are now out of employment and seeking work. In the first case, the age-groups are 15-19, 20-24, 25-29, 30-34, 35+ and Age not stated and in the second case, 15-19, 20-24, 25-34, 35-44, 45-59, 60+ and Age not stated. This table will throw light on educated unemployed for purposes of planning for employment and also for assessing the available man-power.

Part B of this table relates to rural areas. In this table educational levels for total unemployed persons are given. The educational levels are limited to Literate (without educational level), Primary or Junior Basic and Matriculation and above as in Table B-III Part B.

TABLE B-IX

This table shows the persons not at work classified by sex, broad age-groups and type of activity.

This table is prepared separately for total, rural and urban population. It relates to the non-working population. The non-workers are divided into eight categories given in the table according to their activities. This kind of tabulation was never attempted before, nor were questions asked on the activities of non-workers.

The eight categories are based on the recommendations of the United Nations. This table makes the data available separately for those who have an earning without working. Separate data are available in respect of housewives, who though they do domestic work, are not classified as economically active. Separate data are also available for school-attending children which may be useful to the Education Department. There is a category which consists of all other dependents including children and disabled persons.

B-IX—PERSONS NOT AT WORK CLASSIFIED BY SEX,

C — SOCIAL AND CULTURAL TABLES

TABLE C-II

AGE AND MARITAL STATUS

This table is prepared separately for total, rural and urban population. This is a very important demographic table. The age-groups conform to the international requirements. From this table, it can be ascertained whether proportions in the various marital statuses have increased or decreased since last Census and whether any trend is observed in the age of marriage. This table which was prepared on a 10% sample at the 1951 Census is prepared on full count at the present Census.

TABLE C-III

This table is prepared separately in three parts for total, rural and urban population. There are five yearly age-groups up to 34, and other age-groups are 35-44, 45-59, 60+ and Age not stated. While in the previous Censuses, only the total literate population for different age-groups was given, at the present Census, data for broad educational levels are also given. The educational levels are different for rural and urban areas as given in Table B-II. In this Handbook the Table C-III is presented for total and urban population only.

TABLE C-VIII

SCHEDULED CASTES AND SCHEDULED TRIBES

Classification by literacy and industrial category of workers and non-workers among Scheduled Castes, Scheduled Tribes

This table is presented in two parts—Part A relates to Scheduled Castes and Part B relates to Scheduled Tribes. It is prepared separately for total, rural and urban population. The table gives the total population of Scheduled Castes and Scheduled Tribes separately and their distribution by literacy and classification of workers into different industrial categories and the total number of non-workers. Literacy figures of Scheduled Castes and Scheduled Tribes are given for the first time in the present Census. This table is important as it will be the basis for the allocation of Reserved Seats in Parliament and the State Legislatures.

TABLE SCT—I

**INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND
NON-WORKERS BY SEX FOR SCHEDULED CASTES AND
SCHEDULED TRIBES**

The SCT-I Tables are prepared in two parts. Part A relates to Scheduled Castes and Part B relates to Scheduled Tribes.

This table is prepared for each Scheduled Caste and Scheduled Tribe. This table gives the population of each Scheduled Caste and Scheduled Tribe separately, for rural and urban, and also shows in which sectors of industry members of each Scheduled Caste and Scheduled Tribe are working. Data have also been given on the un-wholesome occupations in which the members of Scheduled Castes are working. The population figures of each individual caste and tribe are often required for welfare and other works.

APPENDIX TO TABLE SCT—I

PART A

SCHEDULED CASTES

RURAL

Laharighat P. S.—Bansphor (M 168, F 82), Brittil-Bania or Bania (M 175, F 60), Dhupi or D'obi (M 11, F 2), Dug'a or Dholi (M 135, F 36), Hira (M 600, F 559), Jhalo, Malo or Jhalo-Malo (M 215, F 152), Kaibartta or Jaliya (M 491, F 681), Mehtar or Bhangi (M 20, F 6), Muchi or Rishi (M 478, F 273), Namasudra (M 2,522, F 2,360), Patni (M 127, F 22) Sutradhar (M 1).

Dhing P. S.—Dhupi or Dhobi (M 102, F 151), Hira (M 76, F 11), Kaibartta or Jaliya (M 519, F 500), Muchi or Rishi (M 17), Namasudra (M 19, F 1), Patni (M 1), Sutradhar (M 4).

Rupahihat P. S.—Bansphor (M 9), Brittil-Bania or Bania (M 27, F 45), Dhupi or Dhobi (M 3, F 3), Kaibartta or Jaliya (M 1,080, F 1,714), Muchi or Rishi (M 126, F 102), Namasudra (M 5,383, F 3,901), Patni (M 29, F 43), Sutradhar (M 10, F 18).

Kaliabor P. S.—Bansphor (M 4, F 3), Bhuinmali or Mali (M 15, F 1), Brittil-Bania or Bania (M 77, F 5), Dhupi or Dhobi (M 23, F 27), Dugla or Dholi (F 1), Hira (M 200, F 208), Kaibartta or Jaliya (M 916, F 673), Mehtar or Bhangi (M 2, F 4), Muchi or Rishi (M 60, F 69), Namasudra (M 1,019, F 642).

Marigaon P. S.—Bhuinmali or Mali (M 153, F 98), Brittil-Bania or Bania (M 1,921, F 1,752), Dhupi or Dhobi (M 100, F 42), Hira (M 3,187, F 3079), Jhalo, Malo or Jhalo-Malo (M 45, F 24), Kaibartta or Jaliya (M 2,642, F 2,083), Muchi or Rishi (M 622, F 282), Namasudra (M 2,669, F 2,611), Sutradhar (M 3).

Raha P. S.—Bansphor (M 8, F 2), Bhuinmali or Mali (M 6, F 1), Brittil-Bania or Bania (M 341, F 388), Dhupi or Dhobi (M 26, F 49), Hira (M 1,462, F 1,313), Jhalo, Malo, or Jhalo-Malo (M 57, F 77), Kaibartta or Jaliya (M 5,004, F 4,631), Mehtar or Bhangi (F 30), Muchi or Rishi (M 95,

F 53), Namasudra (M 486, F 615), Patni (M 19, F 37), Sutradhar (M 3, F 6).

Newgong P. S.—Bansphor (M 8, F 3), Bhuinmali or Mali (F 1), Brittil-Bania or Bania (M 1,383, F 1,327), Dugla or Dholi (M 23, F 15), Hira (M 601, F 535), Kaibartta or Jaliya (M 3,754, F 3,688), Muchi or Rishi (M 346, F 207), Namasudra (M 133, F 57), Sutradhar (M 1).

Samaguri P. S.—Bhuinmali or Mali (M 273, F 270), Brittil-Bania or Bania (M 102, F 17), Dhupi or Dhobi (M 59, F 9), Hira (M 318, F 317), Jalkeot (M 66, F 1), Jhalo, Malo or Jhalo-Malo (F 1), Kaibartta or Jaliya (M 1,138, F 1,129), Mehtar or Bhangi (F 1), Muchi or Rishi (M 28, F 19), Namasudra (M 426, F 448), Sutradhar (M 3, F 3).

Jamunamukh P. S.—Bansphor (M 33, F 21), Bhuinmali or Mali (M 128, F 128), Brittil-Bania or Bania (M 266, F 182), Dhupi or Dhobi (M 50, F 27), Hira (F 3), Kaibartta or Jaliya (M 1,043, F 947), Muchi or Rishi (M 49, F 52), Namasudra (M 2,660, F 2,351), Patni (M 135, F 120), Sutradhar (M 20, F 11).

Danka P. S.—Bhuinmali or Mali (M 560, F 536), Brittil-Bania or Bania (M 67, F 22), Dhupi or Dhobi (M 87, F 81), Dugla or Dholi (M 17, F 18), Hira (M 329, F 59), Kaibartta or Jaliya (M 732, F 638), Mahara (M 3, F 5), Mehtar or Bhangi (F 1), Muchi or Rishi (M 114, F 79), Namasudra (M 1,411, F 1,254), Patni (M 1,624, F 1,613).

Lamding P. S.—Bhuinmali or Mali (M 8, F 1), Brittil-Bania or Bania (M 2), Kaibartta or Jaliya (M 1, F 1), Muchi or Rishi (M 3), Namasudra (M 4, F 2), Patni (M 45, F 50).

SCT—II

AGE AND MARITAL STATUS FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This is an important demographic table corresponding to table C-II but it gives data for the total population only. The age-groups are restricted to 0—14, 15—44, 45+ and Age not stated. At present demographic data are not at all available in respect of these communities. This table thus fulfils a very useful role. The age and marital status data give an indication whether the population belonging to Scheduled Castes/Scheduled Tribes is decreasing, stable or increasing.

TABLE SCT—III
EDUCATION FOR SCHEDULED CASTES/SCHEDULED TRIBES

This table is prepared for each Scheduled Caste and Scheduled Tribe and separately, for rural and urban population. It gives the literacy and educational levels for each Scheduled Caste and Scheduled Tribe. In the case of urban areas, data are given for educational levels as in Table B—III Part A. In the case of rural areas, data are given only for mere literates, Primary or Junior Basic and Matriculation and above as given in Table B-III Part B.

TABLE SCT—IV

RELIGION FOR SCHEDULED CASTES/SCHEDULED TRIBES

This table is prepared separately for rural and urban population. This table is intended to give the religions professed by members of each Caste/Tribe belonging to Scheduled Castes/Scheduled Tribes.

SCT-IV PART A—RELIGION FOR SCHEDULED CASTES

NOWGONG DISTRICT

Members of Scheduled Castes can belong either to the Hindu or Sikh religion. In Nowgong District, there are no members of Scheduled Castes belonging to Sikh religion. As all the Scheduled Castes belong to Hindu religion, the caste-wise population is given in Table SCT-I Part A and therefore, no separate figures have been presented in this table. .

SCT-IV PART B—RELIGION FOR SCHEDULED TRIBES

NOWGONG DISTRICT

TABLE SC—I
PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF
ACTIVITY AND EDUCATIONAL LEVELS FOR
SCHEDULED CASTES

This table is prepared for total Scheduled Castes and not for individual castes. It is prepared separately for total, rural and urban population. The table gives data for students and unemployed persons in the non-working population. They are further classified according to broad educational levels consisting of Literates, Primary or Junior Basic, Matriculation or Higher Secondary and Above Matriculation or Higher Secondary. This table gives very useful informations on the students and unemployed persons among the Scheduled Castes.

TABLE ST—I
MOTHER TONGUE AND BILINGUALISM FOR
SCHEDULED TRIBES

Scheduled Tribes have their own peculiar languages and dialects and this table gives the language or dialect of each tribe. Those members of the tribes who have moved out of their homes, and as a result of their contact with the local population, speak some other languages, those languages also are shown in this table.

INTRODUCING THE OFFICIAL STATISTICS

The Tabulation Plan and other proposals for the 1961 Census envisaged the incorporation of official statistics on a large variety of subjects for each district in the District Census Handbook of the district concerned. This proposal was communicated to all Chief Secretaries of State Governments by the Registrar General as early as November 1960 with the request that each State Government should take up the collection of the data in right earnest so that the same may enrich the informations of the District Census Handbook. Each State Government was also welcome to further enrich the District Census Handbook by any additional information that they may like to incorporate in the handbook. The items with other details were listed by the Registrar General and he also indicated the periods against which such data were to be collected. Copies of the above letter and the contents therein were forwarded to all Superintendents of Census Operations by the Registrar General with the request that the matter may be pursued with the State Governments. The data were to be processed and compiled by the Superintendent of Census Operations and incorporated in the District Census Handbooks of each District.

In pursuance of this communication from the Registrar General, I opened a small cell with a Statistical Assistant, one Upper Division Assistant and a few experienced tabulation personnel to take up the work and I addressed all the State and Central Government departments dealing with the subjects under which the data were to be collected and compiled. I pursued the matter not only by letters and reminders, but also by sending my staff to the various departments concerned to copy out the data wherever it was not possible for the department concerned to supply the data to me without extra hands. But in spite of persistent pursuit for about two years, all the data could not be collected. Some informations were not available at all, while some departments were not very co-operative. As the Census Publications cannot wait indefinitely for these informations, I have to process and compile whatever data are available to me.

The subjects listed to be collected embraced almost all spheres of the socio-economic life of the people and the Governmental activities

connected therewith. From rainfall and temperature to places of ancient monuments and worship, from vital statistics to statistics of banks and insurances, from agricultural and land utilisation statistics to the statistics of local bodies, industries and so on, the plan was to appraise the stage of development of each one of the socially and economically important aspect of governmental activities during the last decade which coincides with the two Five Year Plans. Had it been possible to collect all the data in full, a clear picture would have been obtained of the stage of development of each district of Assam as well as the achievements and the impacts of the two Five Year Plans on the economy of each district of Assam. It would also have been possible to bring to light the inter-district and regional disparities in respect of development schemes in each district or region and these data could then be utilised as the basis for future plans and allocation of different schemes.

Realising the fact that well-conceived plans must be based on correct statistics, I started the work of collecting the data with earnestness and tried my utmost to collect as much information as possible of all departments of Government. But in spite of the best of exertions by me and my staff, only about 60% to 70% of the data had reached me till the end of 1962. These available data have been duly processed, compiled and presented in the tables following this Note. Incomplete as they are, even the data thus presented in this book will surely give a picture of the various stages of developments in each district and region of Assam and I hope that my successor may improve upon the same in the next Census. I shall now briefly describe the original plan and the achievements in respect of the collection of data against each one of the broad heads in the cases below :—

1. RAINFALL AND TEMPERATURE

The aim was to give rainfall data of five centres and temperature data for two centres for each district of Assam for the period 1951-60. I addressed the Meteorologists in charge of the Regional Meteorological Centre, Calcutta and the Gauhati Airport.

I also addressed the Deputy Commissioners and Subdivisional Officers as well as the Adviser, Assam Branch of the Indian Tea Association, and I was able to collect rainfall data for five centres and temperature data for one centre so far as this district is concerned.

2. VITAL STATISTICS

I addressed the Director of Health Services, Assam, for supplying me with vital statistics which are so important for population planning and projection. Our plan was to show the births and deaths recorded for each month of the last decade against each police station in the district. The Public Health Department replied that they never have records of births and deaths down to the police station level and so I asked them to give the figures down to the district level, but even that also was not forthcoming. I sent my staff to the office of the Director of Health Services and they had to take much trouble in locating, extracting and compiling whatever data are available in that office regarding vital occurrences from the Vital Statistics Returns lying uncared for in the office premises of the Director of Health Services. But these data are absolutely inaccurate and they cannot give any picture of births and deaths in the district. However, the table is presented for whatever it is worth. In the General Report of the 1951 Census, the then Director of Health Services admitted that there is no doubt that the collection of registration data is defective. As far back as 1921, my predecessor Mr. Llyod remarks that "it is obvious that the vital statistical figures are useless for purposes of comparison or checking with the Census figures." In 1911, Mr. McSwiney remarks that "the inaccuracies are so great that there is danger of inferring that present system of collecting vital statistics is absolutely useless." If the collection of vital statistics had been so bad in the past decades, it has been worse during the decade 1951-61. The Deputy Director of Health Services told me that when the data were collected by the police, mauzadars and the municipalities, something could be had from them; but when the collection has been entrusted to the Panchayats, no figures are available at all. Government may have to devise a definite scheme and a definite agency for the collection of these vital occurrences, otherwise these important statistics are of no use as far as Assam is concerned.

3. LAND UTILISATION AND AGRICULTURE

In respect of land utilisation and agriculture, informations were proposed to be furnished under the heads—(i) land utilisation statistics (ii) area under principal crops (iii)

gross area irrigated (iv) sources of irrigation (v) irrigation projects (vi) yield rates of principal crops (vii) statistics of daily agricultural wages (viii) fortnightly wholesale prices of important commodities month by month (ix) consumption statistics (x) details of socio-economic enquiries and (xi) agricultural extension schemes.

Statistics under these two heads are still in a very poor stage of development in Assam. In April 1961, I addressed the Director of Agriculture, the Director of Land Records and the Director of Statistics requesting them to supply me with as much data under the above heads as are available with each of them. The Director of Agriculture straightaway shifted this responsibility to the Director of Statistics. The Director of Statistics in his turn asked me to collect the data from his office records through some of my staff. The Director of Land Records directed the Settlement Officers and Deputy Commissioners concerned to supply the data direct to me. In accordance with the suggestion of the Director of Statistics, I sent a few employees of my office to collect the available data from his office records. Except for the periods 1901-12, 1951 and again from 1958 onwards, most of the data were available and were collected accordingly. In reply to the Director of Land Records' letter to all Settlement Officers and Deputy Commissioners, only the Deputy Commissioners of Cachar and Goalpara and the Settlement Officer, Sibsagar submitted some figures. The rest were silent. I also made direct correspondence with all the Revenue and Settlement Officers but to no effect. For the period 1901-12 and 1952, I wrote to the Registrar General to see if the necessary figures could be extracted from some of the publications preserved in the archives of the Ministry of Food and Agriculture. The Registrar General was kind enough to take the trouble and get the figures collected and forwarded to me. These figures are included in the tables prepared under this head.

Within the above limitations, tables under Agriculture and Land Utilisation statistics have been prepared and presented. Most of the tables are limited in scope and practical usefulness from the point of view of studying the trends or projecting a policy decision owing to lack of informations for the gaps during the period under reference. The period of reference 1901-1960 is interpreted as consisting of the Census years, namely 1901, 1911, 1921, 1931, 1941, 1951 and 1961. Each Census year represents five years i. e. two years ahead and two years backward of the Census year which is also implied.

But the Census years 1901 and 1961 are exceptions to this rule. In view of the non-availability of data preceding the year 1901 and following the year 1961, the figures for the year 1901 has been worked out on the average of the years 1901 to 1905 and for that of 1961, the average was worked out from the year 1956-57 to 1960-61.

Although the original plan was to publish the prices of staple food stuff and average prices of basic commodities month by month for the last decade with a cost of Living Index, the plan had to be restricted to the presentation of average retail prices of some important commodities due to the non-availability of data.

The construction of the cost of Living Index calls for informations regarding consumption level, weightage, family budget etc. Such informations are not available even in the Department of Statistics. Consequently the idea had to be dropped. The Director of Agriculture has been requested to enlighten me with data regarding experiments in double and triple cropping and agricultural extension schemes, but even though a reply was received from him no data could be had from it. The data relating to consumption statistics and details of socio-economic enquiries have also been left out altogether on account of non-availability of data.

4. LIVESTOCK

Variation in the number of main livestock during 1920-60 was proposed to be given. I addressed the Secretary, Veterinary Department, Government of Assam who directed the Director of Veterinary and Animal Husbandry Department to compile and forward the necessary figures to me. The Director of Veterinary Department could supply me with data only from 1945 onwards. For the earlier period, he said the data were not available in the Department.

5. INDUSTRIES

I wrote to the Department of Industries for a list showing the Cottage and Small Scale Industries of the Nowgong district, but I was referred to the Assistant Director of Industries, Nowgong. I wrote to the latter accordingly and he could furnish me with some data. However, the list showing all categories of industries has been compiled from the Census data extracted from the Houselists and these were presented in the tables. The few data supplied by the Assistant Director of Cottage Industries have also been incorporated in the tables. I also wrote to the Chief Inspector of Factories and the Director of Industries to supply me with informations regarding the growth of factories from 1951 up to 1961, but they expressed their inability to do

so. However, a list showing the large scale establishments as extracted from the Central Publication 'Large Scale Establishments' in India 1957 has been prepared and this was later supplemented with some informations received from the Director of Industries.

6. ADMINISTRATION

Under this head, informations were sought to be incorporated in this book in respect of the (1) number of criminal cases tried, (2) persons convicted, (3) strength of police, jails, (4) receipt of different kinds of taxes, (5) receipt of land revenue, (6) number of registered documents and (7) value of property transferred in the district for the latest period of time for which informations are available. The growth of Co-operative societies from 1951 till 1960 was another item under this head.

Data regarding the number of criminal cases tried and persons convicted, strength of police and jails are collected from the "Report on the Administration of Criminal Justice in the State of Assam" and "Report on the Police Administration in the State" which was subsequently supplemented by data extracted by my staff from the office records of the office of the Inspector General of Police, Assam. The Commissioner of Taxes was prompt enough to supply with the figures of collections under different categories. I wrote to the Revenue Department and the Director of Land Records to send me the figures showing the receipt of land revenue during the last decade. The Director of Land Records referred me back to the Revenue Department. The Revenue Department made a lot of correspondences but no data are available from them. At long last, the compilation team could collect some figures from the 'Statistical Abstract' published by the Director of Statistics and office records of the Revenue Department unofficially. For informations regarding the number of registered documents and value of property transferred in the district, I made necessary correspondences with the Director of Land Records and Inspector General of Registration who referred me to the Accountant General and the District Registrars. I had written to the District Registrars accordingly and at long last the data for Lakhimpur district only had been received. Data regarding different types of Co-operative societies in the district were collected by my staff from the office records of the office of the Registrar of Co-operative Societies, Assam, Shillong which was subsequently supplemented by the informations furnished by the Assistant Registrar of Co-operative Societies, Nowgong.

7. PUBLIC HEALTH & MEDICAL

The list presented regarding this item was prepared from data supplied by the Civil Surgeon, Nowgong.

8. EDUCATION

Under this head, the intention was to show the increase in the number of various categories of schools and colleges including Medical and Technical from 1951 to 1960. I wrote to the Director of Public Instructions, Assam accordingly and in spite of a number of reminders, he could not supply me with the required data. My next course was to depute some of my staff to that office and get the informations collected. In this way, my staff with the co-operation of the office staff of the Director of Public Instruction, could collect informations for two years only. My staff were given to understand that informations for the earlier years were not available in the office of the Director of Public Instruction.

9. PUBLIC ENTERTAINMENT, PRESS AND JOURNALS

The informations furnished under this head were supplied by the Deputy Commissioner, Nowgong.

10. COMMUNICATION

Under this head, informations were attempted to be compiled regarding the number of (1) village roads, (2) roads and bridges, (3) railway stations and (4) important waterways.

For data on village roads, I wrote to the Development Commissioner who was good enough to get the data collected through the Block Development Officers. But the informations received so far are not complete for the whole district. On roads and bridges, the Chief Engineer (Roads & Buildings) was addressed and he supplied me with a booklet from which the informations presented in this book were extracted. The list of railway stations in the district was supplied by the Chief Commercial Superintendent, North-east Frontier Railway, and the list of inland waterways was furnished by the Director of Inland Water Transport, Assam.

11. LOCAL BODIES

This includes the Panchayats in the rural areas and Municipalities and Town Committees

in urban areas. A list of Anchalik Panchayats in the district with relevant particulars was received from the Panchayat and Community Development Department and presented in tabular form. A list of Municipalities and Town Committees in the district during 1961 is also furnished.

12. COMMUNITY DEVELOPMENT

The Development Commissioner, Assam, furnished me with a statement showing the names and stages of all the Community Projects in the district. After compilation to make it intelligible to the general reader, the statement is re-produced in this volume.

13. BANKS, INSURANCES AND SMALL SAVINGS

On request, the Director of Statistics was good enough to furnish me with a list showing the banking institutions in the district. Data on Small Savings were supplied by the Regional Director, National Savings, Government of India, Assam, Shillong. For data on the number of insurance policies in the district, I wrote to the Divisional Manager, Life Insurance Corporation, Gauhati, and the Managing Director, Life Insurance Corporation, Bombay but they could not supply me with the district-wise figures and hence they have been left out.

14. FAIRS AND FESTIVALS AND HATS AND MARKETS

A list of Fairs and Festivals was furnished by the Deputy Commissioner, Nowgong. The Secretaries of Anchalik Panchayats supplied data relating to Hats and Markets.

15. CALENDAR OF IMPORTANT EVENTS

Informations regarding some important events taking place in the district were furnished by the Deputy Commissioner, Nowgong.

16. GAZETTEER OF PLACE NAMES

On this item no information was received from the Deputy Commissioner, Nowgong. Whatever has been given here was compiled by my staff.

* The forest areas exclude the forest villages within the reserves for the years 1912-13 to 1950-51

@ Including seedling areas

+ Average of two years namely 1951-52 and 1952-53

r Figures for the year 1912-13 only

** The informations relating to cultivable wastes, pastures and grazing lands and miscellaneous tree crops and groves etc., were not available separately for the years prior to 1951-52 and these three categories were included under the group "cultivable wastes other than fallows" for the years 1912-13 to 1949-50 which changed into category "other uncultivated land excluding current fallows" for the years 1950-51 onwards. This category since 1951-52 had been divided into (i) cultivable wastes, (ii) permanent pastures and grazing lands and (iii) area under miscellaneous tree crops and groves not included under net area sown

@ @ Including seedling areas for the years 1948-49, 1949-50 and 1950-51

* ** Data presented for 1961 is the average of two years viz. 1956-57 and 1957-58. For the subsequent years viz. 1958-59 to 1960-61 data are not available

N.A.—Not available

**VILLAGE-WISE LIST OF ALL CATEGORIES OF INDUSTRIES IN THE
DISTRICT BASED ON HOUSELIST**

(Industries are denoted by three digits code numbers while the number of
units are shown in brackets against each village)

LAHARIGHAT

Barukatigaon 200 (2), 240 (3), 314 (1); Buragaon 244 (2); Nizgaruwa 207 (1), 273 (2), 281 (2), 369 (3); Sialmarigaon 226 (1); Dhumkuragaon 388 (2); Kantigaon 200 (1); Tatikata Pathar 200 (1); Morabarigaon 200 (1); Borbari 200 (1), 369 (1); Chatribari 200 (1), 369 (2).

DHING

Bachamari 200 (1); Kadamonigaon 200 (1); Tukubari 200 (1); Akarabarigaon 200 (1); Upper Dumdumia 235 (1); Bhurmaraguri 388 (1).

RUPAHIHAT

Malakadhing 200 (2); Sonarikirapura 200 (1); Aitengaguri 273 (1); Kalonitalah 235 (1); Chandragaon 200 (1), 240 (2); Uttargarajan 388 (1); West Amarakanda 235 (3), 367 (3), 393 (3); North Grayan 388 (1); Niz Laokhowa 235 (1), 273 (2), 388 (1); South Bhumuraguri 350 (1); Lailuri 273 (1); Magurmari 200 (1), 281 (5), 314 (2), 393 (1); Sawalani 200 (1), 273 (2), 350 (1), 369 (3), 393 (1); No. 1 Rupahi Town 240 (1), 311 (1), 393 (5); No. 2 Rupahi Town 200 (1), 281 (1), 388 (1); Rupahi 200 (2), 205 (3), 273 (1), 311 (2), 388 (4), 393 (6); Tilia Chapari 393 (1).

KALIABOR

Silghat 273 (3), 369 (1), 388 (1); Kamakhyagaon 394 (1); Sonarigaon 200 (1), 311 (2); Madhatari 235 (1); Misamukh 369 (1); Kuwaritol 205 (2), 273 (3), 394 (1); Sakmuthi 273 (2), 281 (2), 388 (1); Garikuri 200 (1); Bamiunggaon 392 (1); Kumbakari 369 (4), 388 (1); Garubandha 200 (1), 205 (2); Naojan 203 (1); Kaliabor T. E. 217 (1), Sagmuthi T. E. 217 (2), 281 (1); Kaliabor T. E. 269 (1); Seconce T. E. 217 (1), 273 (1), 281 (1); Burapahar T. E. 217 (1); Kuthari T. E. 217 (1), 281 (1), 289 (1).

MARIGAON

Sarubari 273 (1); Nij Maguri 369 (1); Bahakabari 343 (1); Bhakatgaon 388 (1); Dighalbari 273 (2), 369 (1), 388 (1); Gachbari 280 (1); Rajagaon 205 (2), Bihubari 200 (4); Bhurbandha 273 (1), 311 (1); Karangabarigaon 388 (1); Nakhola 273 (2); Rupaibari 235 (1), 273 (1); Mikirgaon 273 (1), 370 (1), 388 (1); Bararak Bangaligaon 200 (1), 369 (2), 388 (1), 393 (1); Jagiroad Railway Colony 289 (1); Jagi Road Railway Station 340 (2).

RAHA

Jaluguti 273 (3), 281 (1); Tokanabari 200 (1), 273 (1); Rohadhola 273 (3); Charaibari 235 (1); Bhumaraguri 235 (1), 273 (3); Jarabari 273 (2); Barapujia 200 (1), 235 (1), 273 (2), 336 (1), 388 (1); Dighalati 369 (3); Gormari 200 (1), Chaparmukh Town 200 (1), 273 (3), 369 (2), 388 (2); Lawpulabari 369 (3); Bhakatgaon 273 (1); Kopahara 273 (2); Niz Mikirgaon 369 (2), 388 (2), 399 (1); Gandhibari 235 (1), 273 (1); Kahiguri 273 (1); Ropahitola 235 (1); Rahagaon 235 (1); Raha Town 200 (2), 235 (1), 273 (17), 384 (1), 388 (5); Kuja-bari 273 (1); Nizbaligaon 273 (3), 281 (1); Chaparmukh 264 (1), 273 (6), 384 (1).

NOWGONG

Maj Jajari 200 (1), 273 (1), 388 (1); Bhalukmari 273 (3); Gosaiguri 273 (1), 388 (1); Kujidah 273 (2), Gedarbari 236 (1); Jamuguri 235 (4), 273 (2); Tokowbari 281 (1), 369 (3); Simaluguri 393 (3); Borbhutigaon 200 (1), 340 (3), Khutikatia 388 (1), Bangkhai 388 (1); Dimaw 273 (3); Tukumani Bebejia 273 (1), 281 (1), 369 (1); Biroh Bebejia 236 (5); Dimaruguri 200 (1); Chota Lajbor 235 (14); Kasalukhowa 273 (1); Borpatari Sutargaon 207 (1); Singhagaon 388 (1); 393 (1); Morangialgaon 311 (1); Sutargaon 200 (1), 388 (2), Nagawsaigaon 314 (1); Borkondoli 369 (4), Nowgong Railway Station 369 (2).

SAMAGURI

Karuwamari 273 (2); Micha 200 (1); Mikirhat 388 (1); Auniati Satra 273 (3), 281 (1), 314 (1), 388 (4), 393 (1); Amalaki 217 (1); Sukanjuri T. E. 370 (1); Jiajuri T. E. 217 (1); Loongsoong T. E. 273 (1), Chapanala T. E. 217 (1); Matigahar T. E. 217 (1); Khangajan grant 217 (1); Barghit 217 (1), 273 (2); Khengteng 273 (1); Dju Valley T. E. 217 (1); 273 (4), 281 (1); Mikirgaon 369 (1), 388 (1), Garabura 369 (2); Niz Chapanala 273 (1), 388 (3).

JAMUNAMUKH

Borputia 200 (6), 205 (2), 273 (6), 281 (3), 289 (1), 311 (2), 350 (3), 388 (2), 393 (2); Upper Barlalong 200 (2); Nambarlalong 200 (1); Mikirgaon 200 (2), 209 (1); Kalkatia Bhakatgaon 281 (1); Borjari Mazagaon 200 (2), 393 (2); Arakapali 206 (1), 217 (1); Chengmari Pathar 311 (1); Madurtali 207 (1); Jungle Block 200 (1); Vadamadi 200 (1); Nijdabaka 200 (1); Sutargaon 369 (4); Makhan Basti 273 (1); Sunaruguri 205 (1); No th Amarigaon 273 (1); Norpathar 369 (1); East Kanduli Bari 200 (1), 273 (4); Kachari Basti 200 (1); Gopal Nagar 367 (1); West Nilbagan 388 (1); Burapani T. E. 217 (1), 369 (2); Sukembari T. E. 217 (1).

LANKA

Kacharipara 200 (2); West Jaruni 200 (1); East Jaruni 200 (2), 205 (1); Nilbagan 200 (2), 388 (1), South Noabil 200 (1); Mawdala Pathar 200 (1); Devaltiangaon 200 (2), 273 (3), 369 (4), 388 (1), 393 (1); Padumani 200 (2), Sabujpur 200 (1); Badarmela 205 (1); Charing Pathar 273 (1); West Chamarali 200 (1); Barangatol 200 (2); Kapahbari 200 (1), 209 (1), 273 (4); Sibpur 200 (1); Jayanti basti 335 (11); Islamnagar 200 (2), 335 (6); Fatehpur 200 (1), 335 (3), Alinagar 335 (5); Dimrupara 369 (4); Tengripara 200 (1), 235 (2); Pubandalalpur 235 (6); East Dhaniram Pathar 200 (2); Golaghatia Basti 200 (1); Fakira basti 200 (1); Dhamhar basti 200 (1); Nandapur 200 (1); Rampur 200 (1); Pub Bhalukmari 273 (1); Telebasti 200 (2); Lankagaon 200 (2); Kharikhana 273 (2); Langakapatti 200 (1); 273 (1), 369 (1); Barpukhuri 369 (1); Lankaswari grant 200 (1); Kaki No. 2 369 (3).

LUMDING

North Lumding 200 (1); South Lumding 202 (1); Gopal Krishna T. E. 217 (1); Machai Balichuhiguri 217 (1); Hojai Railway Station 220 (1), 369 (1).

EXPLANATIONS OF THE CODES USED FOR THE INDUSTRIES IN TABLE 5.1

Sl. No.	Description	Code
1	2	3
1	Production of rice, atta, flour etc. by milling dehusking and processing of crops and foodgrains	200
2	Production of indigenous sugar, gur from sugar cane or palm juice and production of candy	202
3	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
4	Production of bread, biscuits, cake and other bakery products	205
5	Production of butter, ghee, cheese and other diary products	206
6	Production of edible fats and oil (other than hydrogenated oil)	207
7	Production of other food products such as sweatmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
8	Processing of tea in factories	217
9	Manufacture of bidi	220
10	Cotton weaving in handlooms	235
11	Manufacturing of khadi textile in handlooms	236
12	Jute pressing and baling	240
13	Manufacture of other products like rope cordage from jute and similar fibre such as hemp, mesta	244
14	Spinning of silk other than in mills	262
15	Weaving of silk textile by handloom	264
16	Making of textile garments including rain coats and headgear	273
17	Sawing and planning of wood	280
18	Manufacture of wooden furniture and fixtures	281
19	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
20	Manufacture of other wood and allied products not covered by manufacture of wooden industrial goods other than transport equipment ; wooden products such as utensils, toys, artwares ; veneer and plywood, plywood products ; boxes and packing cases etc.	289
21	All other types of printing including lithography, engraving, etching, block making and other works connected with printing industry	302
22	Manufacture of shoes and other leather footwear	311
23	Repair of shoes & other leather footwear	314
24	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
25	Manufacture of soap and other washing and cleaning compounds	336
26	Manufacture of structural clay products such as brick, tile	340
27	Manufacture of structural stone goods, stone dressing and stone crushing	343
28	Manufacture of earthenware and earthen pottery	350
29	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
30	Manufacture of metal products (other than of iron, brass, bell-metal and aluminium) such as tin can	367
31	Enamelling, galvanising, plating, (including electroplating) polishing and welding of metal products	368

Sl. No.	Description	Code
1	2	3
32	Manufacture of sundry hardwares such as G. I. Pipe, wire net, bolt, screw, bucket, cutlery (this will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in code 361, 367, 368, 370, 380, 384, 388, 392, 293, 394 & 399	369
33	Manufacture and assembling of machinery other than electrical, except textile machinery	370
34	Manufacture, assembly and repairing of locomotives	380
35	Repairing and servicing of motor vehicles	384
36	Repairing of bicycles and tricycles	388
37	Assembling and repairing of watches and clocks	392
38	Manufacture of jewellery, silverware and wares using gold and other precious metal	393
39	Manufacture and tuning of musical instruments	394
40	Manufacture and repair work of goods not assignable to any other group	399

TABLE 5.2
STATEMENT SHOWING THE VARIOUS LARGE SCALE INDUSTRIES AND
REGISTERED FACTORIES IN THE DISTRICT

Sl. No.	Name and address of the factory	Daily average number of workers employed
1	2	3
(A) Manufacture of Grain Mill Products (Rice Mills)		
1	Jaganath Srilal Rice Mill, Kampur	13
2	Bardulal Gordhondas Rice Mill, Kampur	28
3	J. C. New Rice Mill, Kamrup	14
4	Fate Chand Basudeo Rice Mill, Hojai	15
5	Ramlal Onkarmall Rice Mill, Raha	16
6	Chaparmukh Rice and Oil Mill, Chaparmukh	15
7	Sri Mahabir Rice Mill, Hojai	8
8	New Rice Mill, Hojai	27
9	Sri Bhagyati Rice Mill, Hojai	26
10	Sri Hanuman Rice Mill, Jamunamukh	9
11	Dasuram Mirzamall Rice Mill, Jamunamukh	7
12	Ramnivas Satyanarayan Rice, Hojai	16
13	Das Gupta Rice Mill, Hojai	30
14	Gangabishan Matilal Rice Mill, Hojai	12
15	Puranigodam Rice Mill, Puranigudam	4
16	Sree Laxmi Rice Mill, Jamunamukh	5
17	Moslem Rice Mill, Jamunamukh	6
18	Sri Jagadamba Rice Mill, Jamunamukh	7
19	Hasmatulla Rice Mill, Jamunamukh	7
20	Meghrajnandalal Rice Mill, Hojai	(a) 12
21	N R Rice Mill, Kathiatoli	31
22	Hukmichand Rice Mill, Kathiatoli	24
23	Hanuman Rice Mill, Panigaon	13
24	Sree Kamakhya Rice Mill, Lanka	24
25	Lanka Rice Mill, Lanka	8
26	Hindustan Rice Mill, Nowgong	5
27	Haiborgaon Rice Mill, Haibargaon	(a) 12
28	Biswanath Rice Mill, Hojai	@ 14
29	B. G Rice Mill, Kampur	@ 15
(B) Manufacture of Edible Oils (other than Hydrogenated oils)		
30	Podder Oil Mill, Jakhlabandha	17
31	Todd's Oil and Rice Mill, Haiborgaon	(a) 47
32	Sree Khetwat Oil Mill, Haiborgaon	15
33	M/S Assam Industries, Hojai	8
(C) Tea Factories		
34	Nonoi T. E. Factory, Sajona	119
35	Kaliabor T. E. Factory, Silghat	63
36	Loongsoong T. E. Factory, Chapanalla	130
37	Seconee T. E. Factory, Jakhlabandha	87

N B.—

* All possible steps were taken for prevention of epidemic diseases, R. H. Is., Health Assistants and Vaccinators carried out mass vaccination and ennoctulation by the M. Os., wherever possible. The Nowgong Municipality manage the Health and Sanitation of the Town.
The U. H. O., Nowgong acted as Food Inspector of the Town. The Pure Food Act was not enforced in the Rural areas as there was no food Inspector for the Rural areas.

** There is a T. B. Clinic at Nowgong having six beds and the clinic renders all possible treatment to the patients. Government also give aid to Scheduled Caste people suffering from T.B. for treatment. The displaced persons suffering from T. B. also receive financial assistance from the R/R Department.

CALENDAR OF IMPORTANT EVENTS DURING THE DECADE 1951-1960

1951—An area of 1,707 square miles of this district inhabited mainly by 'Mikir' transferred to the newly formed United Mikir and North Cachar Hills district vide Government Notification No. TAD/R/31/50/150 dated 13.4.1951.

1952—The first general election in Independent India was held in the months of January-February 1952.

1953—Inauguration of the first community development block in the district at Bhurbandha on the 2nd October, 1953.

1957—The second general election was held in the month of February 1957

1958—Metric system of weights and measures was introduced on the 1st October, 1958.

1960—The unfortunate language disturbance took place in the month of July, 1960.

A NOTE ON THE GAZETTEER OF PLACE NAMES OF THE DISTRICT

Nowgong :

The headquarters town from which the district derives its name is situated on the south bank of the river Kolong. The original name of Nowgong was Noa-gaon (new village).

It is mainly an administrative town with a population of 38,600 though not less important as a centre of trade and commerce. This town is on the Assam Trunk road and also connected by a branch line from Chaparmukh junction of the N. F. Railway.

Hojai :

This town is called the granary of Assam. It is the principal wholesale market for rice in Assam. Because of the existence of many big rice mills and oil mills it has become a town with modern amenities. It has a population of 12,857 according to the 1961 Census. The town is approachable by both road and rail. It has also a town committee.

Lumding :

The opening of the Hills Section railway line of the then Assam Bengal Railway in 1867 connecting Tinsukia in Upper Assam with East Bengal brought with it the inevitable necessity of establishment of a railway district headquarters with all its paraphernalia in a central place. Lumding was selected for the purpose when in 1889, Gauhati was connected with Lumding and in 1895 Dibrugarh was connected with Tinsukia, the jurisdiction of the railway district was more extended and the Lumding railway station became an

important junction. Lumding town is situated on a plateau surrounded by hills. In the Kachari language, the word 'Lum' means water and the 'Ding' means not available. There is no natural water source within a radius of 8 miles of the town.

The town is mainly a railway town with the administrative headquarters of the Lumding Railway district of the N. F. Railway.

Railway is the main communication connecting the town with other places. The only newly constructed Lumding-Lanka road connects the town with other towns. There is neither any regular bus route emanating from the town nor any passing through it.

One college, five H. E. Schools, one M. E. School and five L. P. Schools are there in the town. There is a small bazar to supply the needs of the town.

Dhing :

This town has been treated as such for the first time in the 1961 Census. It is an important jute and other trade centre on the Assam Trunk Road. It has a population of 6,574 according to the Census of 1961.

Jagi-Road :

With the establishment of the Assam Spun Silk Mill in the public sector, the name of this place has come into prominence. It is situated at a distance of 41 miles west of Nowgong on the Assam Trunk Road. It is also connected by rail.
